Using collaborative discussions, students share with clarity, appropriate facts, and evidence with confidence a wide range of knowledge (see content practices, reasoning, and spelling).

- Demonstrates an understanding of mathematical concepts
- Solves problems with precision and accuracy
- Solves problems in multiple ways and explains solutions.

Development of an understanding of the concept of a function is a key goal of the course. The course is designed to be a first course in the subject, and it is intended that students will be able to apply the concepts and techniques learned in the course to other areas of mathematics and science.

Physical activity and health status are important components of health-related quality of life. The purpose of this study was to examine the relationship between physical activity and health status in a sample of older adults. The study included 100 participants aged 65 and older. Data were collected from a survey of physical activity and health status. The results of the study are presented in the following table.

1. *Experimental design and procedures* – Experimental design refers to independently, without given
 2. *Results* – The results of the experiment are presented in this section.
 3. *Discussion* – The discussion section is used to compare a test by testing different strategies
 4. *Conclusion* – The conclusion section is used to summarize the results of the experiment.
 5. *References* – The references section is used to list the sources of information used in the experiment.
 6. *Appendix* – The appendix section is used to provide additional information that is not essential to the main text of the report.
