Learning Geography Beyond the Traditional Classroom
Chew-Hung Chang, Bing Sheng Wu, Tricia Seow, Kim Irvine, 2018-05-08 This book provides a collection of critical pieces that support the idea that good teaching and learning of geography in fieldwork and using technology should consider the dimensions of curriculum design instructional design and resource provision as well as assessment for such learning activities Further it clearly describes the thinking experiences and critical comments concerning two broad areas of learning outside the traditional classroom in the field and with technology

After Dictatorship Peter Hoeres, Hubertus Knabe, 2023-02-20 Numerous studies concerning transitional justice exist However comparatively speaking the effects actually achieved by measures for coming to terms with dictatorships have seldom been investigated There is an even greater lack of transnational analyses This volume contributes to closing this gap in research To this end it analyses processes of coming to terms with the past in seven countries with different experiences of violence and dictatorship Experts have drawn up detailed studies on transitional justice in Albania Argentina Ethiopia Chile Rwanda South Africa and Uruguay

Their analyses constitute the empirical material for a comparative study of the impact of measures introduced within the context of transitional justice. It becomes clear that there is no sure formula for dealing with dictatorships. Successes and deficits alike can be observed in relation to the individual instruments of transitional justice from criminal prosecution to victim compensation. Nevertheless, the South American states perform much better than those on the African continent. This depends less on the instruments used than on political and social factors. Consequently, strategies of transitional justice should focus more closely on these contextual factors.

Ancient and Indigenous Wisdom Traditions in African and Euro-Asian Contexts Ehaab Abdou, Theodore Zervas, 2024-08-01 This book brings attention to the understudied and often overlooked question of how curricula and classroom practices might inadvertently reproduce exclusionary discourses and narratives that omit or negate particular cultures, histories, and wisdom traditions. With a focus on representations and classroom practices related especially to ancient and Indigenous wisdom traditions and cultures, it includes unique contributions from scholars studying these questions in various contexts. The book offers a range of important studies from key African and Euro-Asian contexts including Afghanistan, Albania, Greece, Iran, South Africa, Sweden, Türkiye, and Zimbabwe. The various chapter contributions address and discuss nuances of each of the contexts under study. The contributions also help highlight some key commonalities across these contexts, including how dominant discourses and various forces have historically shaped and continue to shape and reproduce such omissions, misrepresentations, and marginalization. In addition to seeking to reconcile with some of these ancient and Indigenous wisdom traditions and cultures, the book charts a path forward towards more holistic analytical frameworks as well as more inclusive and balanced representations and classroom practices in these aforementioned geographic contexts and beyond. It will appeal to scholars, researchers, undergraduate and graduate students with interests in Indigenous education, curriculum studies, citizenship education, history of education, religion, and educational policy.

Comparative Perspectives on School Textbooks Dobrochna Hildebrandt-Wypych, Alexander W. Wiseman, 2021-04-22 This book examines the discourses on nation building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date practical and scholarly information on qualitative and mixed-method textbook analysis as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.
