The Politics of Military Families René Moelker, Manon Andres, Nina Rones, 2019-06-14. This book examines the politics of military families in relation to the tensions between the state, military organization and private life. It elaborates on the tensions between the advent of challenging worldwide deployment for the military and the prominence of the home front. The volume aims to understand the dynamics of conflict and change within triad figurations at the macro, society, meso, organizational and micro family level and is guided by the following overarching research questions: What are the key issues in the three party dynamics? What tensions exist in these dynamics? How do actors seek to arrive at a balance? What initiatives for change are made? With contributions from international scholars who examine the workings of politics in military families at all three levels, the book argues that members within military families deal with shifting power balances and these are impacted by demands from organizations and the state. This book will be of much interest to students of military studies, sociology, organizational studies and politics. *Insight and Control of Infectious Disease in Global*

Scenario Roy Priti, 2012-03-21. This book is projected as a preliminary manuscript in Infectious Disease. It is undertaken to cover the foremost basic features of the articles. Infectious Disease and analogous phenomenon have been one of the main imperative postwar accomplishments in the world. The book expects to provide its reader who does not make believe to be a proficient mathematician, an extensive preamble to the field of infectious disease. It may immeasurably assist the Scientists and Research Scholars for continuing their investigation, workings on this discipline. Numerous productive and precise illustrated descriptions with a number of analyses have been included. The book offers a smooth and continuing evolution from the principally disease oriented lessons to a logical advance providing the researchers with a compact groundwork for upcoming studies in this subject. Ecosystem Services and Green Infrastructure Andrea Arcidiacono, Silvia

Ronchi, 2020-10-19. The book analyses the relationship between ecosystem services, green and blue infrastructures, GBI and spatial planning in Italy. It provides insights on the opportunities and challenges in the adoption of an ecosystem services (ES) based approach for Spatial Planning, exploring methods and techniques for the design of GBI strategies. Nowadays there is an advance in ES knowledge and a recognition of the benefits of GBI for the quality of human life and biodiversity conservation. The main challenge remains how this knowledge could be integrated into the planning process and how it could guide the decision making process towards sustainable development for contemporary cities. The book collects innovative Italian experiences providing important considerations for operationalizing the ES concept and highlighting different disciplinary attitudes and methodological approaches with the common goal to enhance human well-being. **Collective Creativity for**
