A Guide to the Procurement of Privately Financed Projects Douglas Lamb, Tony Merna, 2004-09-27

A guide to the procurement of privately financed projects: an indicative assessment of the procurement process outlines the concept of privately financed projects (PFP) that can be used for both public-private and private-private interactions. Utilising models from many countries, the guide develops a robust procurement system applicable to PFP and project finance in both the EU and overseas. This guide provides a systematic approach for the preparation and evaluation of privately financed projects (PFP) and services. It is intended to assist both the Principal (often a public body) and the Promoter (private body) at each phase of the procurement process from inception through to financial closure. Principals using this guide should be able to adapt the private finance procurement process for their specific organisation and business sector. Moreover, in the case of the promoting organisation, the guide provides an appreciation of the steps that occur and the various processes undertaken and the associated costs of bidding.

A Guide to the Procurement of Privately Financed Projects: an indicative assessment of the procurement process provides an invaluable understanding of the critical facets involved in PFP and suggests frameworks for developing objective orientated procurement elements.

Public Investment Management Reference Guide Jay-Hyung Kim, Jonas Arp Fallov, Simon Groom, 2020-03-03

The Public Investment Management (PIM) Reference Guide aims to convey country experiences and good international practices as a basis for decisions on how to address a country-specific PIM reform agenda. The country references are drawn largely from previous diagnostics and technical assistance reports of the World Bank. The application of country diagnostics and assessments has revealed a need to address the following issues when undertaking a country reform in PIM: Clarification of the definition and scope of public investment and public investment management; Establishment of a sound legal regulatory and institutional setting for PIM; making sure it is linked to the budget process; Allocation of roles and

responsibilities for key players in PIM across government Strengthening of guidance on project preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies Integration of strategic planning project appraisal selection and capital budgeting Management of multiyear capital budget allocations and commitments Efforts to address effective implementation procurement and monitoring of projects Strengthening of asset management and ex post evaluation Integration of PIM and public private partnership PPP in a unified framework Rationalization and prioritization of the existing PIM project portfolio Development of a PIM database and information technology in the form of a PIM information system The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries Nor does it seek to provide a detailed template for replication across countries this would be impossible given the diversity of country situations Instead each chapter begins with an overview of the specific reform issue lists approaches and experiences from different countries and summarizes the references and good practices to be considered in designing country specific reform actions
