Observing The Solar System Gerald North:

Observing the Solar System Gerald North, 2012-10-25 Written by a well known and experienced amateur astronomer this is a practical primer for all aspiring observers of the planets and other Solar System objects Whether you are a beginner or more advanced astronomer you will find all you need in this book to help develop your knowledge and skills and move on to the next level of observing This up to date self contained guide provides a detailed and wide ranging background to Solar System astronomy along with extensive practical advice and resources Topics covered include traditional visual observing techniques using telescopes and ancillary equipment how to go about imaging astronomical bodies how to conduct measurements and research of scientifically useful quality the latest observing and imaging techniques Whether your interests lie in observing aurorae meteors the Sun the Moon asteroids comets or any of the major planets you will find all you need here to help you get started

Observing Comets Nick James, Gerald North, 2013-11-11 Since comet Shoemaker Levy collided with the planet Jupiter with stupendous force in 1994 there has been an upsurge of amateur interest in comets Most comets are first discovered by amateur astronomers because there are so many amateurs looking for them and techniques and instruments have improved dramatically in the past few years After a short but detailed introduction to the comets themselves Nick James and Gerald North describe comet hunting photographing and imaging comets and digital image processing The use of computers for orbital calculations and even helping to discover new comets is given a full chapter as are advanced techniques including comet photometry and spectroscopy This comprehensive book has an accompanying CD ROM and is at once a primer for comet hunters and a reference text for more advanced amateur astronomers

The Constellation Observing Atlas Grant Privett, Kevin Jones, 2013-08-13 Designed for anyone who wishes to learn the constellations or observe the best and brightest deep sky objects and double stars this book contains an alphabetical list of constellations complete with star maps historical background and highlights of deep sky objects Each entry contains position and physical information on enough stars to support astronomers in star hopping swinging the telescope from star to star to arrive at a faint target It provides a carefully selected list of accessible and rewarding deep sky objects Full color maps show the constellations with star types spectral and physical indicated by the colors used on the map Extended objects such as galaxies and nebulae are shown with the approximate apparent size in the sky With unmatched thoroughness and accessibility this is a constellation atlas that makes the ideal companion to a night s telescope viewing for novices and expert amateur astronomers alike Easy to navigate and refer to it is the key that unlocks the door to greater night sky exploration

Observing Variable Stars, Novae and Supernovae Gerald North, Nick James, 2014-08-21 Gerald North s complete practical guide and resource package instructs amateur astronomers in observing and monitoring variable stars and other objects of variable brightness Descriptions of the objects are accompanied by explanations of the background astrophysics providing readers with real insight into what they are observing at the telescope The main instrumental requirements for

observing and estimating the brightness of objects by visual means and by CCD photometry are detailed and there is advice on the selection of equipment The book contains a CD ROM packed with resources including hundreds of light curves and over 600 printable finder charts Containing extensive practical advice this comprehensive guide is an invaluable resource for amateur astronomers of all levels from novices to more advanced observers Gerald North is a lifelong amateur astronomer In addition to being a member of the British Astronomical Association since 1977 he is also the author of many books including *Advanced Amateur Astronomy* Cambridge 1997 and *Observing the Moon* Cambridge 2000 **Observing the Solar System** Gerald North, 2012-10-25 Written by a well known and experienced amateur astronomer this is a practical primer for all aspiring observers of the planets and other Solar System objects Whether you are a beginner or more advanced astronomer you will find all you need in this book to help develop your knowledge and skills and move on to the next level of observing This up to date self contained guide provides a detailed and wide ranging background to Solar System astronomy along with extensive practical advice and resources Topics covered include traditional visual observing techniques using telescopes and ancillary equipment how to go about imaging astronomical bodies how to conduct measurements and research of scientifically useful quality the latest observing and imaging techniques Whether your interests lie in observing aurorae meteors the Sun the Moon asteroids comets or any of the major planets you will find all you need here to help you get started

Observing the Moon Gerald North, 2007-07-05 Written by an experienced and well known lunar observer this is a hands on primer for the aspiring observer of the Moon Whether you are a novice or are already experienced in practical astronomy you will find plenty in this book to help you raise your game to the next level and beyond In this thoroughly updated second edition the author provides extensive practical advice and sophisticated background knowledge of the Moon and of lunar observation It incorporates the latest developments in lunar imaging techniques including digital photography CCD imaging and webcam observing and essential advice on collimating all common types of telescope Learn what scientists have discovered about our Moon and what mysteries remain still to be solved Find out how you can take part in the efforts to solve these mysteries as well as enjoying the Moon s spectacular magnificence for yourself [Seeing in the Dark](#) Timothy Ferris, 2012-12-18 In *Seeing in the Dark* a poetic love letter to science and to the skies Timothy Ferris invites us all to become stargazers He recounts his own experiences as an enthralled lifelong amateur astronomer and reports from around the globe from England and Italy to the Florida Keys and the Chilean Andes on the revolution that s putting millions in touch with the night sky In addition Ferris offers an authoritative and engaging report on what s out there to be seen what Saturn the Ring nebula the Silver Coin galaxy and the Virgo supercluster really are and how to find them The appendix includes star charts observing lists and a guide on how to get involved in astronomy Ferris takes us inside a major revolution sweeping astronomy as lone amateur astronomers in global networks linked by the Internet make important discoveries that are the envy of the professionals His ability to describe the wonders of the universe is simply magical and his enthusiasm for his subject is
