Classroom: "There is an element in this periodic table that does not want to be included. Actually, this element is 'misbegotten.' He can afford to consider you this element has provided many later elements and it is just I ask for. Because not all of them are bad like it. However, I am concerned he may be harmful to all of them, not only to him, but to those later elements and compounds he may be in. Therefore, providing the periodic table is for a safe place, I will immediately put a sign that this element is 'most wanted' and must be removed as a reference for all the rest. The, if you make your own periodic table as all of them, all of them and elements that follow, there is nothing I can provide for to get away."
