By claiming that it does not necessarily belong to any one mind in particular is inferring then that the self is not in fact a property. Then how can it be said to exist? Thomas Reid (Macquarie, lecture 17) also raises an important objection to Locke's theory of personal identity that seems fairly self-evident to me. We can consider a man as: a child, then in middle age and at old age. If the man in middle age can remember occurrences when he was a young boy, but now that he is an old man can't, then can he be considered a different person from the young boy?

#### Of Personal Identity Hume

According to Locke the old man is the same as the middle aged one, and the middle aged is the same as the child. Yet there is no continuity of consciousness between the three, any break in memory would render them a 'non-person' if we follow Locke's argument-clearly it is logically inconsistent. David Hume's 'bundle theory' of the self seems to me rather more logically coherent. He claimed that humans tend to think of themselves as the same person as they were, say, 10 years ago; that we believed that although one had evolved over the period in a number of ways that the self had endured.

According to Hume however, this was a mistake, and when examined empirically no more than a practical habit: "I never can catch myself at any time without a perception, and never observe anything but the perception"(TI, vi, p. 251). It is clear, posits Hume, our thoughts and perceptions flow from one idea to the next; so we encounter a 'bundle', or grouping, of perceptions throughout our life but no actual continuous and enduring underlying self- or "I" -as a 'unity of consciousness'.

While there is a stability of perceptions over the short term, and some loose association of experiences, there is no overarching continuity of "I" in reality. Hume agrees that we extend over time in actions, we begin a job and finish it some time later, and that our desires also extend in some sort of continuity over time. Furthermore our physical bodies endure reasonably consistently; we age gradually. This according to Hume is what ultimately defines our sense of personal identity. While Hume's theory of the self is attractive in my view, if anything it doesn't go far

Noonan,2013-03-09 Identity has for long been an important concept in philosophy and logic Plato in his Sophist puts same among those fonnns which run through all others The scholastics inherited the idea and the tenninology classifying same as one of the transcendentals i e as running through all the categories The work of Locke and l eibniz made the concept a problematic one But it is rather recently i e since the importance of Frege has been generally recognized that there has been a keen interest in the notion fonnulated by him of a criterion of identity This at first sight harmless as well as useful has proved to be like a charge of dynamite The seed had indeed been sown long ago by Euclid In Book V of his Elements he first gives a useless defmition of a ratio A ratio is a sort of relation between two magnitudes in respect of muchness But then in definition 5 he answers not the question What is a ratio but rather What is it for magnitudes to be in the same ratio and this is the definition that does the work      *Personal Identity and Resurrection* Georg Gasser,2010 In Personal Identity and

Resurrection leading philosophers and theologians present an indispensable resource for anyone interested in the doctrine of bodily resurrection be they philosophers theologians scholars in religious studies or believers interested in examining their faith      *Controversies and the Metaphysics of Mind* Yaron M. Senderowicz,2010 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the

understanding of the issues under discussion

### **Inquiries in Psychoanalysis: Collected papers of Edna O'Shaughnessy**

Edna O'Shaughnessy, 2014-10-10 The papers of Edna O'Shaughnessy are among the finest to be found in psychoanalytic writing. Her work is unified not so much by its subject matter which is diverse but by her underlying preoccupations including the nature of psychic reality and subjectivity and the psychic limits of endurance and reparation. Here a selection of her work edited and with an introduction by Richard Rusbridger is brought together in a collection which demonstrates the contribution that O'Shaughnessy has made to many areas of psychoanalysis from personality organisations, the superego, psychic refuges and the Oedipus complex to the subject of whether a liar can be psychoanalysed. **Inquiries in Psychoanalysis** is a record of clinical work and thinking over sixty years of psychoanalytic practice with children and adults. This wide ranging selection of work will be essential reading for psychoanalysts, psychotherapists and students.

**Personal Identity and Applied Ethics** Andrea Sauchelli, 2017-11-10 Soul, self, substance and person are just four of the terms often used to refer to the human individual. Cutting across metaphysics, ethics and religion, the nature of personal identity is a fundamental and long-standing puzzle in philosophy. **Personal Identity and Applied Ethics** introduces and examines different conceptions of the self, our nature and personal identity and considers the implications of these for applied ethics. A key feature of the book is that it discusses a range of different approaches to personal identity: philosophical, religious and cross-cultural, including perspectives from non-Western traditions. Within this comparative framework, Andrea Sauchelli examines the following topics: Early views of the soul in Plato, Christianity and Descartes; The Buddhist 'no self' views and the self as a fiction; Confucian ideas of our nature and the importance of self-cultivation as constitutive of the self; Locke's theory of personal identity as continuity of consciousness and memory and objections by Butler and Reid as well as contemporary critics; The theory of animalism and arguments concerning embodied theories of personal identity; Practical and narrative theories of personal identity and moral agency; Personal identity and issues in applied ethics including abortion, organ transplantation and the idea of life after death; Implications of life-extending technologies for personal identity. Throughout the book, Sauchelli also considers the views of important recent philosophers such as Sydney Shoemaker, Bernard Williams, Derek Parfit, Marya Schechtman and Christine Korsgaard, placing these in helpful historical context. Chapter summaries, a glossary of key terms and suggestions for further reading make this a refreshing, approachable introduction to personal identity and applied ethics. It is an ideal text for courses on personal identity that consider both western and non-western approaches and that apply theories of personal identity to ethical problems. It will also be of interest to those in related subjects such as religious studies and history of ideas.
