Payment Systems Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the

regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya Introduction to Personal Finance John E.

The Future of High-Cost Credit Jodi Gardner,2022-07-14 This book proposes a new way of thinking about the controversial and complex challenges associated with the regulation of high cost credit specifically payday lending These products have received significant attention in both the media and political arena The inadequacy of regulatory interventions has created ongoing problems with the provision of high cost credit particularly for consumers with lesser bargaining power and who are already financially vulnerable The book tackles two specific gaps in the existing literature The first involves inadequate analysis of the relevant philosophical concepts around high cost credit which can result in an over simplification of what are particularly complex issues The second is a lack of engagement in both the market and lived experience of borrowers resulting in limited understanding of those who use these financial products The Future of High Cost Credit explores the theoretical grounding policy initiatives and interdisciplinary perspectives associated with high cost credit making a novel and insightful contribution to the existing literature The problems with debt extend far beyond the legal sphere and the book will therefore be of interest to many other academic disciplines as well as for those working in public policy and the third sector *Study of the Armed Services Procurement Regulation and Departmental Implementation*

Blank,Michael S. Barr,2009-03-26 One in four American adults doesn t have a bank account Low income families lack access to many of the basic financial services middle class families take for granted and are particularly susceptible to financial emergencies unemployment loss of a home and uninsured medical problems Insufficient Funds explores how institutional constraints and individual decisions combine to produce this striking disparity and recommends policies to help alleviate the problem Mainstream financial services are both less available and more expensive for low income households High fees

minimum balance policies and the relative scarcity of banks in poor neighborhoods are key factors Michael Barr reports the results of an in depth study of financial behavior in 1 000 low and moderate income families in metropolitan Detroit He finds that most poor households have bank accounts but combine use of mainstream services with alternative options such as money orders pawnshops and payday lenders Barr suggests that a tax credit for banks serving primarily disadvantaged customers could facilitate greater equality in the private financial sector Drawing on evidence from behavioral economics Sendhil Mullainathan and Eldar Shafir show that low income individuals exhibit many of the same patterns and weaknesses in financial decision making as middle class individuals and could benefit from many of the same financial aids They argue that savings programs that automatically enroll participants and require them to actively opt out in order to leave the program could drastically increase savings ability Ronald Mann demonstrates that significant changes in the credit market over the past fifteen years have allowed companies to expand credit to a larger share of low income families Mann calls for regulations on credit card companies that would require greater disclosure of actual interest rates and fees Raphael Bostic and Kwan Lee find that while home ownership has risen dramatically over the past twenty years elevated risks for low income families such as foreclosure may well outweigh the benefits of owning a home The authors ultimately argue that if we want to demand financial responsibility from low income households we have an obligation to assure that these families have access to the banking credit and savings institutions that are readily available to higher income families Insufficient Funds highlights where and how access is blocked and shows how government policy and individual decisions could combine to eliminate many of these barriers in the future *The Routledge Companion to Accounting Education* Richard M.S.

Wilson, 2014-04-29 Many enquiries into the state of accounting education training undertaken in several countries over the past 40 years have warned that it must change if it is to be made more relevant to students to the accounting profession and to stakeholders in the wider community This book's overriding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education training and which provides a critical overview of the state of this domain including emerging and cutting edge issues as a foundation for facilitating improved accounting education training scholarship and research in order to enhance the educational base of accounting practice The Routledge Companion to Accounting Education highlights the key drivers of change whether in the field of practice on the one hand e.g. increased regulation globalisation risk and complexity or from developments in the academy on the other e.g. pressures to embed technology within the classroom or to meet accreditation criteria on the other Thirty chapters written by leading scholars from around the world are grouped into seven themed sections which focus on different facets of their respective themes including student curriculum pedagogic and assessment considerations
