

KNOW YOUR CHAIN SAW

A. INTRODUCTION

- Your saw has been designed with safety in mind and includes the following features as standard equipment:
 - Reduced-Kickback Guide Bar (Control Tip)
 - Low-Kickback Chain (Guard Link)
 - Spark Arrestor
 - Muffler Shield
 - Handguard
 - Anti-Vibration System (Models 2000 AV, 2300 AV & 2500 CVA only)

⚠ WARNING

The following features are included on your saw to help reduce the hazard of kickback, however, such features will not totally eliminate this dangerous reaction. As a chain saw user, do not rely only on safety devices. You must follow all warnings and safety instructions and maintenance in this manual to help avoid kickback and other forces which can result in serious injury.

B. KICKBACK SAFETY FEATURES

- Reduced-Kickback Guide Bar, designed with a small nodule tip which reduces the size of the kickback danger zone on the bar tip. Figure 5. A Reduced Kickback Guide Bar is one which has been demonstrated to significantly reduce the number and seriousness of kickbacks when tested in accordance with the safety requirements for gasoline-powered chain saws as set by the American National Standards Institute, Inc., Standard B175.1 - 1983.
- Low-Kickback Chain, designed with a contoured depth gauge and guard link which deflect the kickback force and allow wood to gradually ride into the cutter. Figure 5. Low Kickback Saw Chain is chain which has met the kickback performance requirements of ANSI B175.1 (Safety Requirements for Gasoline-Powered Chain Saws) when tested on a representative sample of chain saws below 38 cubic inch displacement specified in ANSI B175.1. (American National Standards Institute, Inc., Standard B175.1 - 1983).
- Handguard, designed to reduce the chance of your left hand contacting the chain if your hand slips off the front handlebar.
- Position of front and rear handlebars, designed with distance between handles and "in line" with each other. The spread and "in line" position of the handle provided by this design work together to give balance and resistance in controlling the pivot of the saw back toward the operator if kickback occurs.

⚠ WARNING

Do not operate the chain saw unless the safety devices or their specified replacements are properly installed and maintained according to the instructions in this manual. Do not use any other guide bar and chain combination that is not equivalent to the original equipment or not certified to comply with ANSI B175.1. Failure to follow these instructions can result in serious injury.

Figure 5

C. STATE AND LOCAL REQUIREMENTS.

Your saw is equipped with a temperature limiting muffler and spark arresting screen which meets the requirements of California Codes 4442 and 4443. All U.S. forest land and the states of California, Maine, Washington and Oregon require many internal combustion engines to be equipped with a spark arrestor screen by law. Other states are enacting similar laws.

If you operate a chain saw in a state or locale where such regulations exist, you are legally responsible for maintaining the operating condition of these parts. Failure to do so is a violation of a law. Spark arrestor maintenance is on page 17.

D. CARTON CONTENTS

After you unpack the carton:

- Check the contents against the list below.
- Examine the items for damage. Do not use damaged parts.
- Notify your Poulan® dealer immediately if a part is missing or damaged.

NOTE: The filter moving against the wall of the empty tank can cause a rattle-like noise in a powerhead.

KEY

NO. CARTON CONTENTS:

NO.	CARTON CONTENTS:	QTY
