Memory and Society Lars-Goran Nilsson, Nobuo Ohta, 2013-04-03 Memory and Society explores the social factors which influence human memory and our conceptualisation of memory It examines the relationships between memory society and culture and considers the relevance of theories of memory to real world issues The opening section deals with the topic of autobiographical memory It looks at the role of the self how the self is shaped by society but also how it is the self which encodes and constructs memories The Reconstructive nature of episodic memory is considered and how the present acts as the basis for remembering the past with the rememberer's beliefs desires and interpretations playing a central role The middle section looks at the influence of the social environment on learning It debates the relevance of the application of basic principles gained in laboratory settings to learning and memory in social settings These principles are used to throw light on topics such as e learning eyewitness testimonies and optimal treatment and thinking Moreover these real world scenarios are themselves used to throw light on basic principles and how they can be improved The final section looks at the social consequences and costs of memory deficits covering normal aging and pathological changes in old age memory deficits related to dyslexia working memory problems in everyday cognition problems in executive functions in chronic alcoholics and Korsakoff amnesics It also examines methods of rehabilitation for everyday life Incorporating contributions from leading international authorities in memory research as well as new data and ideas for the direction of future research this book will be invaluable to psychologists working in the fields of memory and society

Innovation Systems and Capabilities in Developing Regions Willie Siyanbola, Olumuyiwa Olamade, 2016-05-23 In today's knowledge driven world innovation and innovation systems have become key policy issues However the extent of knowledge that is available on these concepts in less developed countries is still relatively low Much of what we know about innovation theory and systems has come from the developed countries and reflects their world view This apparent knowledge deficit has major implications for less developed countries Innovation Systems and Capabilities in Developing Regions adds to

the growing body of knowledge on developing countries The theoretical and empirical case studies presented here advance the notion that while developing countries may not engage in frontier research a critical knowledge base upon which these countries compete for global markets is emerging There is evidence that state and non state actors are increasingly emphasising policies that sit within the framework of national innovation systems This book illuminates this shift in policy competence at national levels The contributions in this volume highlight the need for thorough understanding of the role of diffusion based innovation linked to technology transfer and acquisition They also provide empirical evidence on the drivers dynamics and impact of such innovation in developing economies and the constraints that apply Contributors also document the application of the innovation system approach in developing countries as well as the build up and diffusion of technological capabilities within innovation systems Academics higher level students policy makers and practitioners involved with innovation and the economics of technical change particularly in developing countries will find this a valuable book
