and University Teaching Joanna Gilmore, Molly Hatcher, 2023-07-03 This book is a guide for designing professional development programs for graduate students The teaching competencies framework presented here can serve as the intended curriculum for such programs The book will also be an excellent resource for evaluating programs and will be an excellent resource for academics who study graduate students This book presents the work of the Graduate Teaching Competencies Consortium to identify organize and clarify the competencies that graduate students need to teach effectively when they join the professoriate To achieve this goal the Consortium developed a framework of 10 teaching competencies organized around three overarching questions What do graduate students need to achieve by the end of their graduate education to be successful teacher scholars What do graduate students need to understand about higher education to have successful careers as educators What do graduate students need to do to be successful teachers during their graduate student careers Although much work has been done to identify the competencies of effective teachers in higher education only a small portion of this work has been conducted with graduate student instructors This is an important area of research given that graduate students are critical in the higher education academic pipeline Nationally graduate students teach between 25% and 50% of courses offered at the undergraduate level Graduate student teaching is also critical because during early teaching experiences teachers establish a teaching style and set of teaching skills which will endure as graduate students enter the professoriate It is important to develop a teaching competency framework that is specific to graduate student instructors as they often have unique needs and roles as teachers For example graduate student instructors are in the unique position of becoming experts in their field concurrent with learning to teach Moreover as many professional development programs for graduate student instructors evolve based upon factors such as available resources and perceived needs of graduate students this framework will be a useful aid for thoughtfully designing strategic evidence based comprehensive professional development opportunities and programs

Jaussi,2006-04-01 The main question that guided the thinking behind this book can be stated as follows What kind of leadership behavior must executives of technology driven organizations display to spur performance excellence To address this question the authors conducted videotaped interviews of executives from 65 organizations including General Electric Qualcomm The Vanguard Group and Barclays Global Investors to identify common behaviors and traits that lead to organizational success In addition to the interviews they surveyed the executives followers to evaluate the leadership and organizational culture to examine successful executive leadership from multiple reference points The authors found that displaying outstanding executive leadership doesn t necessarily require a commanding presence a genius level IQ expertise or even a strong command and control system At the heart of outstanding strategic leadership was an ability to envision a strategy for taking the raw inputs provided by their environments e g people technology ideas opportunities and then to weave them into an integrated pattern or system of social technical and intellectual resources that ultimately produce dramatically higher levels of organizational success factors The book includes dozens of stories and narratives from the executive leaders to offer readers an in depth look at what constitutes effective strategy focused leadership in technology driven organizations *Compounding Sterile Preparations* American Society of Health-System Pharmacists,2009-01-07 An essential component of your competency assessment and training program the companion guide and assessment record contains In dept review material to highlight and reinforce the video presentation exercises to enhance understanding of key concepts summary checklists assessment questions and an individual assessment record to document completion of the program *U.S. Government Research & Development Reports* ,1970 *Planning for Higher Education* ,1998
