Botana curus is a valuable plant because it produces Curol, which is used as medicine to treat cancer. *Botana curus* grows very slowly. It is on the endangered species list, so its ability to provide Curol in large quantities is limited.

Three similar plant species (X, Y, and Z) may be related to *Botana curus*. These 3 plant species grow faster, and therefore plentiful. The plant that is the most similar to *Botana curus* might also produce Curol. You will work as a research team to determine which plant is most closely related to *Botana curus*. You can do this by studying the plants in different ways.
