

- 9 Vance waded in. The water came about to his navel. He went steadily on for some distance and then, to my bewilderment, turned his back slightly on the stream. It was the first deviation from the plan.
- 10 He took another step or two, stopped, suddenly abandoned his stick to the stream and yelled to us: "Let out the rope!"
- 11 I was horrified by this second deviation from the plan. What on earth was he up to? Before we had even properly grasped his intention, he had thrown himself on the stream and was swimming a breast stroke. As was inevitable, the stream at once caught him and quickly swept him to where it foamed and bubbled like a waterfall over the edge of the track. The unexpected speed with which all of this had happened was the most terrifying thing about it. Even so, Vance had got almost to the far bank, was reaching for it — when the water swept him over the edge and he disappeared from our view.
- 12 Quillan and I were braced for the shock. The rope tightened in a flash. The strain was tremendous. Vance's body, no longer water-borne but suspended out of sight below the edge of the rocky track, with the weight of the water streaming on top of it, strained the rope to the utmost. Yet it held.
- 13 I think it would have continued to hold if the angle and the violent impact of the water on the body had not now with incredible speed whipped Vance along the sharp edge of the rocks, swung him from the far side towards our bank and chafed the rope badly in the process. It still held for a second or two. We worked our way along it towards him — were within two metres of him — when the rope snapped.

Paragraph 8

Laurens, Quillan and two of the porters prepare the rope while Vance takes a big stick which they had cut for him.

Paragraph 9

Vance wades in and the author is shocked and worried when Vance turns his back on the stream. This is not part of the plan.

Paragraph 10

Vance moves forward, lets go of the stick and shouts to the others to let out more rope.

Paragraph 11

The author is shocked when he sees Vance trying to swim across. Everything happens fast. Vance has almost reached the far bank when the stream sweeps him away and over the edge of the waterfall.

Paragraph 12

The group prepare to hold fast as Vance falls over. The rope does not snap.

Paragraph 13

The rope, though strained by the violent impact of the water and damaged by the sharp rocks, holds for a few seconds. They move forward to try and save him. But when they are just 2 metres from him, the rope snaps. We infer that Vance has crashed to his death below.

Defining the Curriculum Ivor Goodson, Stephen J. Ball, 2012 This book explores some of the major processes involved in the definition of school subject knowledge Using historical ethnographic methods the contributors to the collection highlight and examine some of the factors involved at national institutional and classroom levels in the making of school subjects The first section of the book outlines the theoretical and methodological basis for the study of school subjects and the reasons for and the possibilities of such a study are considered In the second section some histories of school curricula are presented from a variety of settings colonial schools in Africa working class schools of the nineteenth century nursery schools and the conflicting forces of determination and change in school subjects are identified and examined The third section focuses on the contemporary school situation and the papers isolate and investigate some of the interest groups and social processes which enter into or affect the realization of school knowledge in the classroom

Statistics Richard M. Jaeger, 1990-05 Richard M Jaeger does such a good job of communicating the concept in nontechnical and applicable terms In particular I like Jaeger's emphasis on understanding the logic of the methods and interpreting statistical reports His book provides the student with an alternative explanation of the underlying logic of statistical methods that I provide in class Students have found Jaeger to be very understandable I have had almost universal praise of Jaeger Perhaps the most impressive aspect of this book is its clear exposition of some rather complex concepts Jaeger's explanations are clear he uses realistic and generally understandable examples and does not take himself too seriously This is an excellent nontechnical statistics text Barry Nocks Clemson University This book has become one of my favorite resources and references I love reading it It offers pleasant reading that is interesting and completely comprehensible And most important it has improved my understanding of

the concepts that had previously eluded me Thank you again for offering the definitive aid to understanding the world of statistics Who would have believed that such a topic could have been presented so wonderfully Elaine R Kersten Doctoral Candidate University of Massachusetts at Amherst From the First Edition The premise is that many of us need an understanding of statistics in order to become intelligent consumers of the reports and research generated by business government social scientists and educators The style is lucid and lively A careful reading of this book could well make one reexamine the old cliché about lies damn lies and statistics Choice Using clear explanations and excluding the equations readers learn from examples how to understand what statistics are what they mean and how they are used and interpreted particularly in the social and behavioral sciences Includes problems with answers The book will help anyone who needs to understand statistics Journal of the Institute of Health Education I found the author's presentation clear and readable He introduces the different types of case study in a very logical manner well illustrated with practical examples and accompanied with helpful guidelines to encourage researchers to consider a broader range of research methods I would recommend this book to novices and established researchers alike It has good breadth and depth of coverage presented in a very digestible form Statistician Well written Richard M Jaeger's lighthearted style so often lacking in statistical texts makes enjoyable reading Because it starts with the basics of making sense of numbers and works its way gently up to some more complex statistical techniques the book will be useful to the complete novice as well as the more experienced number cruncher Nursing Standard Comprehensive text clear illustrations and an outstanding glossary An excellent resource An invaluable reference No graduate student in a statistics course should be without it ANNA Journal Popular in its first edition with researchers and practitioners and widely adopted for undergraduate and graduate courses the new second edition continues to give readers a conceptual understanding of statistics without becoming mired down in statistical computations Presuming no statistical background and beginning with the most fundamental methods for drawing statistical inferences to a variety of real world applications Richard M Jaeger clearly describes and illustrates statistical procedures New to the second edition are chapters on John Tukey's exploratory data analysis including stem and leaf displays a new chapter on threats to internal and external validity a complete revamp of the measurement chapter to bring it up to date with the latest edition of the Standard for Educational and Psychological Testing and updated examples of research applications in every chapter Specific examples are drawn from the files of the Educational Resources Information Centers ERIC and a complete glossary of statistical terms as well as a new subject index are provided An excellent resource for both undergraduate and graduate students or anyone else desiring statistical comprehension

How to Write Better Medical Papers Michael Hanna, 2019-03-20

This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published Manuscripts are typically rejected and or sent back for revisions several times before ever being published One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers research methodology ethics statistics data visualization writing revising and the practicalities of publishing Instead of wasting the reader's time discussing trivialities of punctuation spelling etc this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals The section Preparing covers the range of methodological ethical and practical aspects that researchers need to address before starting to write their paper The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems The section Drafting describes what to write in all the various parts of a paper the Introduction Methods Results Discussion Abstract etc The section Revising explains and illustrates how to improve the writing style of any manuscript The section Publishing discusses how to navigate the peer review process and all other practical aspects of the publishing phase This book draws on the author's decade of experience as an independent medical writer and research consultant but it is not written merely as the personal opinion of yet another expert The entire book is grounded in the existing scientific and scholarly literature with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want Thus this book provides a more evidence based scholarly account of how medical scientific papers should be written in order to improve medical communication and

accelerate scientific progress After reading this entire book cover to cover medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle This book is essential reading for anyone conducting research in clinical medicine life sciences or health sciences *Audio-visual Language Journal* ,1979 Yearbook of the National Society for the Study of Education National Society for the Study of Education,1929 **Personally Speaking** - W.
