Extracellular Vesicles and Their Importance in Human Health Ana Gil De Bona, Jose Antonio

Reales-Calderon, 2020-03-04 Extracellular vesicle is a wide term that involves many different types of vesicles. Almost all the cell types studied secrete vesicles to the extracellular environment related to cell-cell communication. Extracellular vesicles have been found in different biological fluids such as blood, milk, saliva, tears, urine, and cerebrospinal fluid. These vesicles transport different molecules including mRNA, proteins, and lipids, some of them cell type specific that make them ideal biomarkers in both health and disease conditions. However, their contribution to different conditions is not well understood. The aim of this book is to provide an overview of the extracellular vesicles in the human body, how they are internalized, and their participation in several diseases.

M1/M2 Macrophages: The Arginine Fork in the Road to Health and Disease Charles Dudley Mills, Laurel L. Lenz, Klaus Ley, 2015-03-23 Macrophages have unique and diverse functions necessary for survival. And in humans and other species, they are the most abundant leukocytes in tissues. The innate functions of macrophages that are best known are their unusual ability to either kill or repair. Since killing is a destructive process and repair is a constructive process, it was stupefying how one cell could exhibit these 2 polar opposite functions. However, in the late 1980s, it was shown that macrophages have a unique ability to enzymatically metabolize Arginine to Nitric Oxide (NO), a gaseous non-specific killer molecule, or to Ornithine, a precursor of polyamines and collagen for repair. The dual Arginine metabolic capacity of macrophages provided a functional explanation for their ability to kill or repair. Macrophages predominantly producing NO are called M1, and those producing Ornithine are called M2. M1 and M2 dominant responses occur in lower vertebrates and in T cell deficient vertebrates, being directly driven by Damage and Pathogen Associated Molecular Patterns (DAMP and PAMP). Thus, M1 and M2 are innate responses that protect the host without Adaptive Immunity. In turn, M1/M2 is supplanting previous models in which T cells were necessary to activate or alternatively activate macrophages, the Th1/Th2 paradigm. M1 and M2 macrophages were named such because of the additional key findings that these macrophages stimulate Th1 and Th2 like responses, respectively. So, in addition to their unique ability to kill or repair, macrophages also govern Adaptive Immunity. All of the foregoing would be less important if M1 or M2 dominant responses were not observed in disease. But they are. The best example to date is the predominance of M2 macrophages in human tumors, where they act like wound repair macrophages and actively promote growth. More generally, humans have become M2 dominant because sanitation, antibiotics, and vaccines have lessened M1 responses. And M2 dominance seems the cause of ever-increasing allergies in developed countries. Obesity represents a new and different circumstance. Surfeit energy, e.g., lipoproteins, causes monocytes to become M1 dominant in the vessel walls, causing plaques. Because M1 or M2 dominant responses are clearly causative in many modern diseases, there is great potential in developing the means to selectively stimulate or inhibit either M1 or M2 responses to kill or repair, or to stimulate Th1 or Th2 responses, depending on the circumstance. The contributions here are

meant to describe diseases of M1 or M2 dominance and promising new methodologies to modulate the fungible metabolic machinery of macrophages for better health

Lima, Enrique Rojas, Pilar Villena, 2019-11-01 This paper examines the impact of e invoicing on firm tax compliance and performance using administrative tax data and quasi experimental variation in the rollout of VAT electronic invoicing in Peru We find that e invoicing increases reported firm sales purchases and value added by over 5 percent in the first year after adoption The impact is concentrated among smaller firms and sectors with higher rates of non compliance suggesting that e invoicing enhances compliance by lowering compliance costs and strengthening deterrence The reform s positive effects on tax collection are hindered by shortcomings in the VAT refund mechanism in Peru suggesting that digital tools such as e invoicing should be complemented by other reforms to improve revenue mobilization **Cities Interrupted** Shirley
