Official Board Meeting Minutes March 18 2014:

The Olympic Winter Games at 100 Heather L. Dichter, Sarah Teetzel, 2023-12-11 2024 marks the 100 year anniversary of the winter sports week festival celebrated in Chamonix in 1924 which is now recognized as the first Olympic Winter Games. As a globally watched quadrennial mega event the Winter Olympics is unique from both summer sport festivals and other winter festivals such as the Winter X Games. This book explores the impacts, issues, and legacies of the past century of the Olympic Winter Games. Grounded in sport history, the chapters in this volume draw on the disciplines of cultural history, diplomatic history, global history, environmental history, and media history to analyze the continued allure of the Winter Olympics a century after its origin and in light of the sustained and significant problems facing the Olympic movement. Host cities' efforts to create positive and lasting legacies are analyzed to highlight the challenges and complexities that have plagued the Olympic movement throughout the last century. *The Olympic Winter Games at 100* is essential reading for any researcher, advanced student, or scholar with an interest in Olympic Studies, sports development, sport policy, and history. The chapters in this book were published as two special issues in *The International Journal of the History of Sport* but now with a revised introduction and conclusion. Organized as District 8 of the United Electrical Radio and Machine Workers (UE) and led by open Communist William Sentner, workers developed a style of unionism designed to confront corporate power and to be a force for social transformation in their community and nation. Feurer studies District 8 through a long lens, establishing early twentieth-century contexts for these conflicts. Exploring the role of radicals in local movement formation, Feurer argues for a civic unionism that could connect community and union concerns to build solidarity and contest the political economy. District 8's spirited unionism included plant occupations in St. Louis and Iowa, campaigns to democratize economic planning, and local strategies for national bargaining that were depicted as a Communist conspiracy by a corporate-influenced Congressional committee in Evansville, Indiana. District 8 was destroyed through reactionary networks and the anti-Communist backlash of the mid-twentieth century, but Feurer argues that its history tells another side of the labor movement's formation in the 1930s and 40s and can inform current struggles against corporate power in the modern global economy.
