Ophthalmology Review Manual Kenneth C. Chern, Michael A. Saidel, 2012-02-20 This manual provides an organized reference to aid in management of clinical problems and preparation for board exams. A standardized outline format is used in order to emphasize relevant information and allow rapid retrieval of key points. Each section starts with anatomy and physiology, the essential framework for understanding the basis for the related diseases, and then summarizes specific disease entities in outline format with major features highlighted. For quick reference, over 200 specific disease entities are listed along with corresponding page numbers on the inside front cover of the book. Figures have been selected to demonstrate classic findings and to highlight important relationships. The manual covers all material listed in the OKAP Subject Outline published by the AAO.

**Comprehensive Manual of Ophthalmology** Ahmed E, 2010-06-15 Comprehensive Manual of Ophthalmology in which sufficient information has been provided in easy to understand language with a definite and uniform format. Many tables have been incorporated for summarizing key facts about different diseases. Enough standard colored illustrations will be of immense help. A short list of Further Readings has been added at the end of each chapter for those who want to pursue further on the particular topic. I consider this humble endeavor as a mini textbook of ophthalmology in a refreshingly reader friendly fashion which I presume will be quite useful for both undergraduate and postgraduate students, residents, and even practicing ophthalmologists.
