

SAFETY NOTICE: Exposure to vibrations through prolonged use of gasoline-powered hand tools could cause blood vessel or nerve damage to the fingers, hands, and wrists of people prone to circulation disorders or abnormal swelling. Prolonged use in cold weather has been linked to blood vessel damage in otherwise healthy people. If symptoms occur such as numbness, pain, loss of strength, change in skin color, or bruising, or loss of feeling in the fingers, hands, or wrists, discontinue the use of this tool and seek medical attention. An anti-vibration system does not guarantee the avoidance of these problems. Users who operate power tools on a continual and regular basis must monitor closely their physical condition and the condition of this tool.

SPECIAL NOTICE: Your saw is equipped with a horsepower limiting muffler and spark arresting screen which meets the requirements of California Codes 4462 and 4463. All U.S. forest land and the states of California, Idaho, Maine, Minnesota, New Jersey, Oregon, and Washington require many internal combustion engines to be equipped with a spark arrester screen by law. If you operate a chain saw in a state or locale where such regulations exist, you are legally responsible for maintaining the operating condition of these parts. Failure to do so is a violation of the law. Refer to the SERVICE section for maintenance of the Spark Arrester.

Failure to follow all Safety Rules and Procedures can result in serious injury. If situations occur which are not covered in this manual, use care and good judgement. If you need assistance, contact your Authorized Service Dealer or call 1-800-333-6722.

ASSEMBLY

The assembly tool provided with your saw is the only tool needed for assembly. Protective gloves (not provided) should be worn during assembly.

ATTACHING THE BAR & CHAIN (not already attached)

WARNING: Recheck each assembly step if the saw is reassembled. Always wear gloves when handling the chain. The chain is sharp and can cut you even when it is not moving!

- Loosen and remove the chainpawl and the barclasp from the saw.
- Remove the plastic shipping spacer (if present).

Location of shipping spacer

- An adjusting pin and screws are used to adjust the tension of the chain. It is very important when assembling the bar that the pin located on the adjusting screw aligns with holes in the bar. Turning the screw will move the adjustment pin up and down the screw. Loosen this adjustment pin before you begin mounting the bar onto the saw. See illustration below.

Adjustment screw

- Turn the adjusting screw counter-clockwise to move the adjusting pin almost as far as it will go to the rear. This should allow the pin to be near the correct position. Further adjustment may be necessary as you mount the bar.
- Mount the bar as illustrated.
- Slide the bar toward the rear of the saw as far as possible.
- Prepare the chain by checking the proper direction. Without following the illustration it is easy to place the chain on the saw the wrong direction. Use the illustration of the chain to determine the proper direction.
- Place the chain onto the sprocket located behind the clutch drum. Fit the chain between the teeth in the sprocket.
- Start at the top of the bar and fit chain into groove around the guide bar.
- Pull the bar forward until the chain is snug in the groove of the bar.
- Hold guide bar against the saw frame and install the barclasp. Make sure the adjusting pin is aligned with the hole in the bar. Remember this pin moves the bar forward and backward as the screw is turned.
