mass spectrometry SIFT MS is a chromatography free direct analysis technique that is ideally suited to real time quantitative
analysis of volatile compounds in air at trace concentrations SIFT MS utilises highly controlled soft chemical ionisation in the
form of gas phase ion molecule reactions coupled with mass spectrometry detection to provide both broad spectrum and
specific analysis of volatiles with diverse functionalities This book provides readers with a broad understanding of the
principles of the SIFT MS technique and how it differs from conventional chromatographic approaches that are used for
analysis of volatiles It will also aid users to identify existing and new methods where adoption of SIFT MS would be
advantageous e g through reduction in sample preparation or higher throughput and provides the knowledge and insight
required to develop best practice methods and effectively evaluate the data that they generate and approaches to optimising
validating and transferring methods to routine analysis and other applications This book addresses two needs for SIFT MS
users As a reference work it gathers the fundamental principles from the literature and laboratory experience to provide a
practical textbook for those using SIFT MS in routine laboratories research organisations and academia It utilises a
procedure based approach to apply principles to routine analysis simplifying implementation in routine analysis laboratories
while also accelerating effective application in other specialisations The audience for this book is method developers and
laboratory technicians engaged in routine analysis and research laboratories but it is also well suited to graduate students
