Proverbs 1-15 Bernd U. Schipper, 2019-11-05 The book of Proverbs is more than the sum of its parts Even if some individual proverbs and collections could be older the overall composition stems from the late Persian or early Hellenistic period In its present form the book of Proverbs introduces the scribal student to the foundations of sapiential knowledge and its critical reflection By discussing different worldviews and contrasting concepts on the relationship between God the world and humanity the book of Proverbs paves the way to both the critical wisdom of Job and Ecclesiastes and the masterful combination of Wisdom and Torah in Sirach Scholarly research has long situated the book of Proverbs within ancient Near Eastern literature but declared it to be something alien within the Hebrew Bible In contrast to such a position the present commentary interprets the book of Proverbs against the background of both ancient Near Eastern literature and the literature of the Hebrew Bible One aim of the commentary is to discuss new ancient Near Eastern parallels to the book of Proverbs with a special focus on Egyptian wisdom literature including Demotic texts from the sixth to fourth centuries BCE An equally important aim of this commentary is a detailed exegesis of Proverbs 1-15 as well as an analysis of the overarching strategy of the book of Proverbs as a whole Taking the prologue of the book in Prov 1:1-7 as a hermeneutical key the book of Proverbs turns out to be a masterful composition addressing both the beginner and the advanced sage With its allusions to other biblical texts including the book of Deuteronomy the Psalms and the Prophets the book of Proverbs can be connected to forms of scribal exegesis in Second Temple literature By using the same scribal techniques as other literati of his time the scribal sage responsible for some parts of the book as well as its final compilation seeks to provide deeper insight into the complex world of scribal knowledge and sapiential thought

How God Forms Abraham to Be a Blessing Qiang Fu, 2023-02-22 This book aims to understand God's interactions with Abraham in relation to God's command that Abraham be a blessing Gen 12:2d which is directly tied to God's goal that in you all the families of the earth will be blessed Gen 12:3b The book proposes a formative narrative approach to examine interactions between character and plot the movement of plot and the connection between sequential plots An analysis of thirteen Abrahamic narratives Gen 12:22 suggests a classification

based on four different types of interactions between God and Abraham which indicate how cooperation and conflict between God and Abraham advance the narrative's plot. The book then proposes a narrative discourse analysis to examine how Abraham evolved through different stages of the narrative by moving from deviation to cooperation. Detailed analysis of this transformation process reveals three turning points in Abraham's life. The formative narrative approach and narrative discourse analysis proposed in this book can contribute to the analysis of two important aspects of Old Testament narratives: the formation of plot and the cause and effect structure in narrative discourse.

Primary care medicine is the new frontier in medicine. Every nation in the world has recognized the necessity to deliver personal and primary care to its people. This includes first contact care, care based in a positive and caring personal relationship, care by a single healthcare provider for the majority of the patient's problems, coordination of all care by the patient's personal provider, advocacy for the patient by the provider, the provision of preventive care and psychosocial care, as well as care for episodes of acute and chronic illness. These facets of care work most effectively when they are embedded in a coherent, integrated approach. The support for primary care derives from several significant trends. First, technologically based care costs have skyrocketed beyond reason or availability, occurring in the face of exploding populations and diminishing real resources in many parts of the world, even in the wealthier nations. Simultaneously, the primary care disciplines—general internal medicine and pediatrics and family medicine—have matured significantly.
