Jisung Park,2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It s hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities

for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally New York State Regents Exam Kaplan,Kaplan Educational Center Staff,2000-02 Kaplan s guides to the New York State Regents Exams come complete with a comprehensive review of all the tested material plus Kaplan s exclusive test taking strategies This powerful combination makes the New York State Regents Exam Chemistry Second Edition a highly effective way for you to score higher on this very challenging test Are you ready for the New York State Regents Chemistry exam You will be with Kaplan s proven plan for success STEP 1 Take a Diagnostic Test The results of this test will outline your strengths and weaknesses You will find out the exact areas on which you need to focus your preparation STEP 2 Review the Tested Material Kaplan takes you through each section step by step providing you with effective tips and strategies to successfully answer every type of question STEP 3 Practice with Real Regents Exams Practice makes perfect And with this book you ll practice with the real thing actual Regents exams including detailed explanations for every answer and an analysis of your performance STEP 4 Succeed on the Test Follow Kaplan s plan for success on the Regents and you will score higher In fact we guarantee it See details inside Latino Almanac Nicolás Kanellos,2022-09-20 A celebration of people and pride Explore the achievements and contributions of Latinos in the United States with this illuminating history Latinos in the United States are a vibrant mix of people and multiple identities each unique varied and accomplished Beginning with the Spanish explorers in the sixteenth century Latinos have been an important part of American society They ve fought the Revolutionary War the Civil War and all wars in between and since and in the last decade their businesses have grown at twice the pace of the overall U S economy The most complete and affordable single volume reference on Latino history available today Latino Almanac From Early Explorers to Corporate Leaders honors the history and the impact of Latinos on the United States This hefty tome is a fascinating mix of biographies little known or misunderstood historical facts and enlightening essays on significant legislation movements current issues and achievements across a variety of fields including business labor politics the military music sports law media religion art literature theater film science technology and medicine A large collection of 650 biographies includes both celebrated and lesser known Latino stars such as Dolores Fernandez Huerta labor leader Sonia Sotomayor Supreme Court justice Juan Felipe Herrera U S poet laureate Roberto C Goizueta businessperson former CEO of Coca Cola Selena Gomez actor singer producer Rebecca Lobo basketball player sports analyst Anthony D Romero executive director of the American Civil Liberties Union ACLU Alexandria Ocasio Cortez U S congressperson Ellen Ochoa astronaut
