Balancing Reading and Language Learning Mary Cappellini, 2024-11-01 Teaching reading to children in a language that is not their own is a daunting task. *Balancing Reading and Language Learning: A Resource for Teaching English Language Learners K-5* provides the strategies proven to be effective in a balanced reading program while at the same time valuing the native culture and first language skills of the English language learner. Combining the best classroom practices and research on teaching reading and language acquisition, author Mary Cappellini integrates effective reading instruction with effective language instruction. Through the framework of a balanced reading program, she emphasizes the importance of constantly listening for and assessing children's language and reading strategies during read aloud, shared reading, guided reading, and independent reading, including literature circles. Included in this text are: How to set up an environment that will allow all English language learners to succeed; Stages of English language proficiency and stages of reading development; how they compare and how to use them to assess and plan for individual children; A focus on tapping into children's prior knowledge in their primary language while teaching reading in English and using Spanish-English cognates to help develop academic language; A collection of in-depth lessons and mini-lessons based on children's language proficiency and reading strategy needs with ongoing assessment, teacher reflection, and with an emphasis on choosing the right books to match their reading and language level; How to manage numerous guided reading groups with children of all stages of reading and language proficiency; Thematic planning with sample units for primary and upper grades to support academic language and meet content standards; Ideas for literacy evenings, school tours, and other events to involve parents with the learning community; Extensive resources, numerous forms and checklists, observation sheets, planning sheets, literature response sheets, focus sheets for shared and guided reading, and more. Regardless of how many or how few ELL students a teacher has, this invaluable resource helps them meet the challenges and reap the rewards of teaching children to read as they learn the language.

Teaching New Literacies in Grades K-3 Barbara Moss, Diane Lapp, 2009-11-30 Even the youngest readers and writers in today's classrooms can benefit enormously from engagement with a wide range of traditional and nontraditional texts. This teacher-friendly handbook is packed with creative strategies for introducing K-3 students to fiction, poetry, and plays; informational texts; graphic novels; digital storytelling; Web-based and multimodal texts; hip-hop advertisements; math problems; and many other types of texts. Prominent authorities explain the research base underlying the book's 23 complete lessons and provide practical activities and assessments for promoting decoding, fluency, comprehension, and other key literacy skills. Snapshots of diverse classrooms bring the material to life; helpful reproducibles are included.

The Paideia Classroom Laura Billings, 2013-10-18 With sample lesson plans, student assessment forms with rubrics, and other practical materials, this book shows how the principles of the Paideia Program can result in student learning and understanding.

Navigating Elementary Science Teaching and Learning Sophia Jeong, Lynn A. Bryan, Deborah J.

Tippins,Chelsea M. Sexton,2023-09-26 This book is a resource for both prospective and practicing elementary teachers as they learn to teach science in ways which foster the development of a community of science learners with multiple perspectives and diverse approaches to problem solving It includes cases that feature dilemmas embedded in rich narrative stories which characterize the lives of teachers of science and by extension their students and serve as tools for discussion critique and reflective practice The introduction to the book explores changing contexts for elementary science teaching and learning and describes how case based pedagogy can be used as a tool for both instruction and research Each subsequent section of the book includes cases that are organized around topics such as contemporary approaches to teaching elementary science new roles for technology and the creation of inclusive learning environments for all students in elementary science Each case is followed by reflective commentaries and concludes with questions for reflection and discussion Teachers will benefit from these cases as they explore the complexities and ambiguities of elementary science teaching and learning in today s classrooms

Marine Protected Areas S. Gubbay,2012-12-06

Marine protected areas MPAs have an important role in marine conserva tion programmes around the world Although most have been established relatively recently when compared with protected areas on land there is considerable expertise on their identification setting up and management Some techniques have been adapted from those used on land Others are novel and unique to marine conservation The chapters in this book give an insight into this fast developing field where experiment and innovation work alongside techniques which have been tried and tested The guiding princi ples behind key stages in the setting up and management of MP As are described and case studies illustrate how they have worked While it is most encouraging to read about the successes the case studies also point to difficulties which have been encountered Not all of the examples are new or recent but together they illustrate what is happening in this field
