Bibliographic Guide to Psychology New York Public Library. Research Libraries, 1999 *Knowledge Creation in*

Education Seng Chee Tan, Hyo Jeong So, Jennifer Yeo, 2014-06-12 This book arises from research conducted through Singapore's National Institute of Education on such topics as integrating knowledge building pedagogies into Singaporean classrooms with both students and teachers across school levels from primary schools to high schools. Additionally, international scholars contribute research on theories of knowledge creation, methodological foundations of research on knowledge creation, knowledge creation pedagogies in classrooms, and knowledge creation work involving educators. The book is organized in two sections. Section A focuses on theoretical, technological, and methodological issues where sources of justification for claims are predominantly theories and extant literature, although empirical evidence is used extensively in one chapter. Section B reports knowledge creation practices in schools with teachers, students, or both; the key sources of justification for claims are predominantly empirical evidence and narratives of experience. The editor asserts that schools should focus on developing students' capacity and disposition in knowledge creation work at the same time; leaders and teachers alike should continue to develop their professional knowledge as a community. In the knowledge building vernacular, the chapters are knowledge artifacts—artifacts that not only document the findings of the editors and authors but that also mediate future advancement in this area of research work. The ultimate aim of the book is to inspire new ideas and to illuminate the path for researchers of similar interest in knowledge creation in education.

Bibliographic Guide to Education, 2002 lists publications cataloged by Teachers College, Columbia University, supplemented by The Research Libraries of The New York Public Library.

The Triumph of Ethnic Progressivism James J. Connolly, 2009-06-30 Progressivism, James Connolly shows us, was a language and style of political action available to a wide range of individuals and groups. A diverse array of political and civic figures used it to present themselves as leaders of a communal response to the growing power of illicit interests and to the problems of urban industrial life. As structural reforms weakened a ward-based party system that helped mute ethnic conflict, this new formula for political mobilization grew more powerful. Its most effective variation in Boston was an ethnic progressivism that depicted the city's public life as a clash between its immigrant majority, the people, and a wealthy Brahmin elite, the interests. As this portrayal took hold, Bostonians came to view their city as a community permanently beset by ethnic strife. In showing that the several reform visions that arose in Boston included not only the progressivism of the city's business leaders but also a series of ethnic progressivisms, Connolly offers a new approach to urban public life in the early twentieth century. He rejects the assumption that ethnic politics was machine politics and employs both institutional and rhetorical analysis to reconstruct the inner workings of neighborhood public life and the social narratives that bound the city together. The result is a deeply textured picture that differs sharply from the traditional view of machine reform conflict.

Horizontal Inequalities and Conflict F. Stewart, 2016-01-22 Drawing on econometric evidence and in-depth studies of West Africa, Latin America, and Southeast Asia, this book explores how horizontal inequalities—ethnic, religious, or racial—are a source of violent conflict and how political

economic and cultural status inequalities have contributed Policies to reverse inequality would reduce these risks
