Scholten,2022-06-03 This open access textbook provides an introduction to theories concepts and methodological approaches concerning various facets of migration and migration related diversities It starts with an introduction to migration studies and continues with an introductory reading of migration drivers migration infrastructures migration flows and several transversal topics such as gender and migration It also covers politics policies and governance as well as specific research methods As an interactive guide this book develops an innovative format that brings a connection with various online sources This means that whereas the chapters bring together literature in a coherent way they are also connected to IMISCOE s online interactive Migration Research Hub for further reading and for more empirical material on migration and diversity As such this textbook provides a very useful introductory reading for undergraduate and graduate students as well as for policymakers policy advisors and all those interested in studies on migration and migration related diversities Social Media and Democratization in Iraqi Kurdistan Munir Mohammad,2019-10-15 Social Media and Democratization in Iraqi Kurdistan assesses the implications of social media usage for democratization in the context of Iraqi Kurdistan A considerable number of studies examine the impact of social media on the practice of democracy in liberal democratic contexts and on the democratization process in nondemocratic contexts However little is known about the rise and implications of using the Internet and social media platforms for democratization processes in a hybrid political system like that of Iraqi Kurdistan which combines elements of both democracy and authoritarianism The author investigates the use of social media platforms by citizens politicians electoral candidates and political parties and its significance for political participation and political communication which are selected as important elements of democratization Based on original qualitative research including interviews with activists politicians and party leaders and an analysis of relevant social media content in the Kurdish language especially on the social media platform Facebook the author argues that rather than the increase in online political participation and political communication contributing to the consolidation of democracy in the Kurdish nascent democracy it is increasing political polarization exacerbating incivility of political discourse and enabling monitoring of opposition forces by the authorities **Professional Practice and Learning** Nick Hopwood,2016-01-22 This book explores important questions about the relationship between professional practice and learning and implications of this for how we understand professional expertise Focusing on work accomplished through partnerships between practitioners and parents with young children the book explores how connectedness in action is a fluid evolving accomplishment with four essential dimensions times spaces bodies and things Within a broader sociomaterial perspective the analysis draws on practice theory and philosophy bringing different schools of thought into productive contact including the work of Schatzki Gherardi and recent developments in cultural historical activity theory The book takes a bold view suggesting practices and learning are entwined but distinctive phenomena A clear and novel framework is developed based on this idea The argument goes further by demonstrating how new coproductive relationships between professionals and clients can intensify the

pedagogic nature of professional work and showing how professionals can support others learning when the knowledge they are working with and sense of what is to be learned are uncertain incomplete and fragile Cambridge Handbook of Research Approaches to Business Ethics and Corporate Responsibility Patricia H. Werhane, R. Edward Freeman, Sergiy Dmytriiev, 2017-11-16 While there is a large and ever expanding body of work on the fields of business ethics and corporate social responsibility CSR there is a noted absence of a single source on the methodology and research approaches to these fields In this book the first of its kind leading scholars in the fields gather to analyse a range of philosophical and empirical approaches to research in business ethics and CSR It covers such sections as historical approaches normative and behavioural methodologies quantitative qualitative and experimental perspectives grounded theory and case methodologies and finally a section on the role of the researcher in research projects This book is a valuable and essential read for all researchers in business ethics and CSR not only for those starting out in the fields but also for seasoned scholars and academics

The Crime of All Crimes Nicole Rafter, 2016-03-29 Cambodia Rwanda Armenia Nazi Germany History remembers these places as the sites of unspeakable crimes against humanity and indisputably of genocide Yet throughout the twentieth century the world has seen many instances of violence committed by states against certain groups within their borders from the colonial ethnic cleansing

the Germans committed against the Herero tribe in Africa to the Katyn Forest Massacre in which the Soviets shot over 20 000 Poles to anti communist mass murders in 1960s Indonesia Are mass crimes against humanity like these still genocide And how can an understanding of crime and criminals shed new light on how genocide the crime of all crimes transpires In The Crime of All Crimes criminologist Nicole Rafter takes an innovative approach to the study of genocide by comparing eight diverse genocides large scale and small well known and obscure through the lens of criminal behavior Rafter explores different models of genocidal activity reflecting on the popular use of the Holocaust as a model for genocide and ways in which other genocides conform to different patterns For instance Rafter questions the assumption that only ethnic groups are targeted for genocidal cleansing and she also urges that actions such as genocidal rape be considered alongside traditional instances of genocidal violence Further by examining the causes of genocide on different levels Rafter is able to construct profiles of typical victims and perpetrators and discuss means of preventing genocide in addition to delving into the social psychology of genocidal behavior and the ways in which genocides are brought to an end A sweeping and innovative investigation into the most tragic of events in the modern world The Crime of All Crimes will fundamentally change how we think about genocide in the present day [Journal of the House of Representatives of the United States](#) United States.
