Section II is divided into three chapters on the bones and their landmarks. The final three sections contain the muscle chapters. One section for the lower extremities, one for the axial skeleton, and one for the upper extremities. The chapters are divided by regions, i.e., ankle, knee, shoulder, etc.

Occupational Therapy for People Experiencing Illness, Injury or Impairment E-Book (previously entitled Occupational Therapy and Physical Dysfunction) Michael Curtin, Mary Egan, Jo Adams, 2016-12-16 The sixth edition of this classic book remains a key text for occupational therapists supporting their practice in working with people with physical impairments, stimulating reflection on the knowledge, skills, and attitudes which inform practice and encouraging the development of occupation-focused practice. Within this book, the editors have addressed the call by leaders within the profession to ensure that an occupational perspective shapes the skills and strategies used within occupational therapy practice. Rather than focusing on discrete diagnostic categories, the book presents a range of strategies that, with the use of professional reasoning, can be transferred across practice settings. The new editors have radically updated the book in response to the numerous internal and external influences on the profession, illustrating how an occupational perspective underpins occupational therapy practice. A global outlook is intrinsic to this edition of the book, as demonstrated by the large number of contributors recruited from across the world. Covers everything the student needs within the physical disorders part of their course. Links theory of principles to practice and management. Written and edited by a team of internationally experienced OT teachers, clinicians, and managers. Gives key references and further reading lists for more detailed study. Written within a framework of lifespan development in line with current teaching and practice. Includes practice scenarios and case studies. Focuses on strategies. New title echoes the contemporary strength-based and occupation-focused nature of occupational therapy practice, which involves working with people and not medical conditions and diagnoses. Content and structure reviewed and shaped by an international panel of students, new graduates, 22 additional chapters, 100 expert international contributors. Evolve Resources: evolve.elsevier.com. Curtin OT contains 3 bonus interactive practice stories with reflective videos, 360 MCQs, 200 reflective questions, 250 downloadable images, critical discussion of the ICF in the context of promoting occupation and participation.
