Curriculum Development for Students with Mild Disabilities Carroll J. Jones, 2010

Many teachers of students with mild disabilities experience difficulty writing IEPs and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks goals and benchmarks, this resource assists in preparing IEPs including the new process of identification of children with disabilities through their responses to intervention RTI. An additional focus is on the impact of federal laws IDEA and NCLB on the curriculum and assessment in schools today. The book has been reorganized into ten chapters including historical perspectives, early childhood special education curricula, oral expression curricula, reading and listening curricula, written expression curricula, mathematics curricula, educational technology curricula, K-12 social and self-competence curricula, science curricula, and evaluation reports and case studies. Appendix. The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment. These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs using age appropriate and developmentally appropriate teaching and assessment materials. Chapter summaries included for review purposes also serve as selective and motivational reading. With special education teachers in short supply and the demands on their time so great, this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process, determining what skills students need to move effectively to the next level.
