The Effects of Smartphones on Attention in Classrooms

Level 2

Attention Span
Smartphone Use

Level 1

Method

Level 2

In order to gain a better insight into the effects of smartphones on the attention span in classrooms, semi-structured interviews were conducted with 50 high school students.

Sampling Method

A non-probability sample was used to gather participants for this research. The driving factors behind this decision were cost and convenience.

Level 3

Procedure

Potential participants were asked to complete a screening survey that consisted of demographic questions and basic questions about smartphone usage.

Level 4

Participant Recruitment. Participants in this study were recruited through posts on relevant social media.

Level 5

Tools. The school's Facebook and Instagram accounts were used to target relevant participants. The reach of the posts was increased by paying a small advertising fee.

Compensation. As an incentive, students who participated were granted an exemption from an essay assignment.

Level 4

Participant Selection. Participants were selected based on their age, gender, and level of smartphone usage to acquire a representative sample of the population.

Level 3

Sample Characteristics

The 50 selected participants were aged between 14 and 18, with an approximately equal number from each grade. There were 22 male and 28 female participants.

Level 2

Interview Procedure

The interviews were conducted on school premises and lasted approximately one hour. A flexible framework of six questions was used to prompt open-ended discussion.

for publication is essential for disseminating nursing knowledge and this book will surely prepare budding authors and serve as a resource for experienced authors. It is a great reference for authors at all levels. Score 100 5 stars. Doody's Writing and publishing a manuscript in the field of nursing is a long and often daunting process but it can be simplified by understanding the ins and outs of developing a manuscript and submitting it for publication. This second edition is written specifically for nurses for beginning and experienced authors, nurses writing articles about their practice and nursing students at all levels to guide their preparation of papers for both courses and publication. This guide gives a clear description of the entire writing process beginning with an idea, searching the nursing literature, preparing an outline, writing a draft and revising it, developing the final product and finally getting published. This edition also includes new content emphasizing the importance of disseminating information on evidence-based practice (EBP). Readers will learn how to write EBP papers, report research for use in practice and disseminate the findings of clinical projects and innovations. Key features: Takes the reader through the process of writing from making early writing decisions, generating ideas, identifying the audience and more. Serves as a reference for students at all levels of nursing education, research and practice. Includes tips for writing chapters, books, editorials, journal articles and other forms of writing. Details the submission, editorial review and publication processes. Includes a new chapter on guidelines for writing EBP papers including integrative and systematic reviews, meta-analysis and meta-synthesis.
