Smart Big Data in Digital Agriculture Applications Haoyu Niu, YangQuan Chen, 2024-02-28 In the dynamic realm of digital agriculture the integration of big data acquisition platforms has sparked both curiosity and enthusiasm among researchers and agricultural practitioners This book embarks on a journey to explore the intersection of artificial intelligence and agriculture focusing on small unmanned aerial vehicles UAVs unmanned ground vehicles UGVs edge AI sensors and the profound impact they have on digital agriculture particularly in the context of heterogeneous crops such as walnuts pomegranates cotton etc For example lightweight sensors mounted on UAVs including multispectral and thermal infrared cameras serve as invaluable tools for capturing high resolution images Their enhanced temporal and spatial resolutions coupled with cost effectiveness and near real time data acquisition position UAVs as an optimal platform for mapping and monitoring crop variability in vast expanses This combination of data acquisition platforms and advanced analytics generates substantial datasets necessitating a deep understanding of fractional order thinking which is imperative due to the inherent complexity and consequent variability within the agricultural process Much optimism is vested in the field of artificial intelligence such as machine learning ML and computer vision CV where the efficient utilization of big data to make it smart is of paramount importance in agricultural research Central to this learning process lies the intricate relationship between plant physiology and optimization methods The key to the learning process is the plant physiology and optimization method Crafting an efficient optimization method raises three pivotal questions 1 What represents the best approach to optimization 2 How can we achieve a more optimal optimization 3 Is it possible to demand more optimal machine learning exemplified by deep learning while minimizing the need for extensive labeled data for digital agriculture This book details the foundations of the plant physiology informed machine learning PPIML and the principle of tail matching POTM framework It is the 9th title of the Agriculture Automation and Control book series published by

Interdisciplinary Education Zehui Zhan, Siyuan Lyu, Shijing Niu, Kai Tu, Qingna Lai, 2025-02-11 Interdisciplinary education is the future trend in global K 12 curriculum reform and all K 12 subject teachers should be prepared to meet the challenges it presents. This book aims to explore the competence structure that K 12 teachers need to effectively design and implement interdisciplinary education from a general perspective of subject integration. Drawing on relevant theories from interdisciplinary education and teacher competence research, the book clarifies the fundamental connotations of teachers' interdisciplinary teaching competence and identifies the key elements of this competence from an international perspective. It also examines the transformation pathways for teachers from subject specific teaching to interdisciplinary teaching based on China's national curriculum framework. On this basis, the book constructs a framework for K 12 teachers' interdisciplinary teaching competence and applies it to the cultivation of interdisciplinary teaching staff, guiding the design of assessment tools, improvement strategies and training programs for enhancing interdisciplinary teaching competence. The book will encourage teachers from different disciplines to participate in the design and implementation of interdisciplinary teaching, thereby promoting the sustainable development of interdisciplinary education. Global educators and researchers interested in interdisciplinary education, competence framework development, teacher professional development and Chinese education will find valuable insights in this book. **Athletic and Orthopedic Injury Assessment** David C. Berry, Michael G.

Miller, Leisha M. Berry, 2017-07-05 *Athletic and Orthopedic Injury Assessment: Case Responses and Interpretations* is a companion book that provides responses and interpretations to the case studies in *Athletic and Orthopedic Injury Assessment: A Case Study Approach*. Research evidence based practices and professional experience form the basis of these responses and interpretations. The suggested answers for case questions include information such as identification of differential and clinical diagnoses, explanations of diagnostic tests, relevant anatomical information and more. We hope you find this book helpful in responding to the case questions whether you are an instructor leading class discussions and analyzing student work, a preprofessional preparing to interpret the case scenarios on the BOC national certification examination or a student seeking to compare the suggested answers with your own analyses. *Resources in Education*, 1982 **Stability Assessment for Underground Excavations and Key Construction Techniques** Hanhua Zhu, Mengchong Chen, Yu Zhao, Fusheng Niu, 2016-11-01 This book examines how the state of underground structures can be determined with the assistance of force

deformation and energy It then analyzes mechanized shield methods the New Austrian tunneling method NATM and conventional methods from this new perspective The book gathers a wealth of cases reflecting the experiences of practitioners and administrators alike Based on statistical and engineering studies of these cases as well as lab and field experiments it develops a stability assessment approach incorporating a stable equilibrium which enables engineers to keep the structure and surrounding rocks safe as long as the stable equilibrium and deformation compliance are maintained The book illustrates the implementation of the method in various tunneling contexts including soil rock mixed strata tunneling beneath operating roads underwater tunnels and tunnel pit excavation It offers a valuable guide for researchers designers and engineers especially those who are seeking to understand the underlying principles of underground excavation **Rock landslide risk assessment, stability analysis and monitoring for the development of early warning systems and reinforcement measures** Mowen Xie,Yan Du,Yujing Jiang,Bo Li,2023-06-29 **Geoinformatics and Modelling of**

Landslide Susceptibility and Risk Sujit Mandal,Subrata Mondal,2019-05-28 This book discusses various statistical models and their implications for developing landslide susceptibility and risk zonation maps It also presents a range of statistical techniques i e bivariate and multivariate statistical models and machine learning models as well as multi criteria evaluation pseudo quantitative and probabilistic approaches As such it provides methods and techniques for RS GIS based models in spatial distribution for all those engaged in the preparation and development of projects research training courses and postgraduate studies Further the book offers a valuable resource for students using RS GIS techniques in their studies
