Computational Forensics Sargur N. Srihari, Katrin Franke, 2008-08-15 This Lecture Notes in Computer Science LNCS volume contains the papers presented at the Second International Workshop on Computational Forensics IWCF 2008 held August 7-8 2008. It was a great honor for the organizers to host this scientific event at the renowned National Academy of Sciences Keck Center in Washington DC USA. Computational Forensics is an emerging research domain focusing on the investigation of forensic problems using computational methods. Its primary goal is the discovery and advancement of forensic knowledge involving modeling computer simulation and computer based analysis and recognition in studying and solving forensic problems. The Computational Forensics workshop series is intended as a forum for researchers and practitioners in all areas of computational and forensic sciences. This forum discusses current challenges in computer assisted forensic investigations and presents recent progress and advances. IWCF addresses a broad spectrum of forensic disciplines that use computer tools for criminal investigation. This year's edition covers presentations on computational methods for individuality studies computer based 3D processing and analysis of skulls and human bodies shoe print preprocessing and
