Andersen, Stephanie J. Hanrahan, 2015-01-05 According to the President's Council on Fitness Sports Nutrition If exercise could be packaged into a pill it would be the single most widely prescribed and beneficial medicine in the nation Yet the incorporation of physical activity into a regular routine proves difficult for many Bringing together a field of experts Doing Exercise Psychology uses applied theories alongside authentic client interactions to address the challenging psychological components of physical activity Doing Exercise Psychology helps students understand how to build connections with individual clients strengthen the professional relationship through listening and understand clients needs The text features diverse topics bridging health psychology and exercise psychology and demonstrating the increasingly important role of physical activity in overall wellness and health The first chapter is devoted to the development of mindfulness as a practitioner while another addresses the difficulties professionals encounter with their own inactivity encouraging self reflection in order to be more helpful and open with clients A key feature of many chapters in Doing Exercise Psychology is the in the trenches dialogue between practitioner and client accompanied by follow up commentary on what went right and what went wrong in particular sessions Through these real world scenarios students will witness firsthand the methods that are most effective in communicating with clients The text also explores complex questions such as these What are the implications and consequences of using exercise as a component of psychological therapies How can practitioners help clients with impaired movement abilities as a result of chronic conditions or illness embrace physical activity as part of their therapy or their lives How can exercise be incorporated in therapies to change nutrition smoking and alcohol habits Why are some exercise protocols that are extremely effective for some but not for others How can relationships interrelatedness and attunement to others be vehicles for healthy change in whatever kind of therapy is being done The book is arranged so that information flows progressively covering major themes early and then applying them to the field Part I introduces the relationship building motif by covering the variety of relationships that one might find in exercise and physical activity settings Part II addresses specific conditions and behavior change with suggestions for encouraging activity in those who are also working to quit smoking reduce alcohol consumption or modify their nutrition habits Part III deals directly with chronic and major medical conditions that professionals will contend with on a regular basis including cancer heart disease and multiple sclerosis Part IV delves into the dark side of exercise such as overtraining exercise dependence and eating disorders A growing and exciting area of study exercise

The Great Rebirth Anders Aslund, Simeon Djankov, 2014-10-29 The fall of communism 25 years ago transformed the political and economic landscape in more than two dozen countries across Europe and Asia In this volume political leaders scholars and policymakers assess the lessons learned from the great rebirth of capitalism highlighting the policies that were the most successful in helping countries make the transition to stable and prosperous market economies as well as those cases of countries reverting to political and economic authoritarianism The authors of these essays conclude that visionary leadership and a willingness to take bold and comprehensive steps achieved the best outcomes and that privatization of state owned enterprises and deregulation were essential to success Recent backsliding such as the reversal of economic and democratic reforms in Russia and Hungary has cast a shadow over the legacy of the transition a quarter century ago however

The Metaphysics of Kindness Asher Walden, 2015-03-06 Religious world views reserve a central and prominent place for human moral action yet they must also contend with the reality of human moral failings Is it possible to anchor moral knowledge and practice in the framework of a moral universe If so how do you explain why things go wrong Must the religions appeal to faith alone or can they develop a rational framework for their moral visions The Metaphysics of Kindness Comparative Studies in Religious Meta ethics explores the attempted solutions of four pivotal philosophers from very different traditions the Neo Confucian Zhu Xi the German Idealist Arthur Schopenhauer the Mahayana Buddhist Santideva and the progenitor of the Kyoto School Nishida Kitaro Each position is investigated sympathetically and independently yet there is an underlying commonality weaving the different studies together compassion Each philosopher treats compassion not only as one virtue among others but as a kind of meta virtue the one that is in some respect the logical and or psychological basis for all the other virtues It is also a trait that is both at the heart of human nature and also somehow at the heart of nature itself
