A Radically Democratic Response to Global Governance Margaret Stout, Jeannine M. Love, 2016-12-08 This book presents a critique of dominant governance theories grounded in an understanding of existence as a static discrete mechanistic process while also identifying the failures of theories that assume dynamic alternatives of either a radically collectivist or individualist nature Relationships between ontology and governance practices are established drawing upon a wide range of social political and administrative theory Employing the ideal type method and dialectical analysis to establish meanings the authors develop a typology of four dominant approaches to governance The authors then provide a systematic analysis of each governance approach thoroughly unpacking and critiquing each one and exploring the relationships and movements among them that engender reform and revolution as well as retrenchment and obfuscation of power dynamics After demonstrating that each governance approach has fatal flaws within a diverse global context the authors propose an alternative they call Integrative Governance As a synthesis of the ideal types Integrative Governance is neither individualist nor collectivist while still maintaining the dynamic character required to accommodate responsiveness to cultural contexts

Political Ideology and Social Work Mitchell Rosenwald, 2023-08-08 Social workers

encounter politically fraught issues in many aspects of their professional lives. They must make decisions that touch on topics such as abortion, family planning, end of life care, immigration rights, economic assistance, and racial inequality among many others. How do personal political beliefs influence social workers' education and training, practice with clients and communities, and efforts to achieve social change? Mitchell Rosenwald provides a comprehensive examination of the role of politics in the social work profession. He discusses how political ideology relates to social work education and practice at all levels, identifying and analyzing the strands of thought that have shaped the profession's history up to the present day. This book examines how social workers strive to balance their personal views with the professional obligation to provide therapy, case management, and information and referral to their clients. It explores how the social work profession struggles to encourage and support political diversity among its members and what happens when an individual's political beliefs challenge commonly held attitudes. Considering both clinical and policy work, *Political Ideology and Social Work* also offers recommendations for encouraging political reconciliation in order to strengthen the profession.

Global Geopolitical Power and African Political and Economic Institutions John James Quinn, 2015-12-30. *Global Geopolitical Power and African Political and Economic Institutions* When *Elephants Fight* describes the emergence and nature of the prevailing African political and economic institutions in two periods. In the first, most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites, usually through one or no party, military political systems, inward-oriented development policies, and/or state-led and often state-owned industrialization. In the second period, most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems, more outward-oriented trade policies, and the privatization of many state-owned or controlled sectors, though significant political and economic power remains in their hands. The choices made in each period were consistent with prevailing ideas on governance and development, the self-interests of political elites, and the perceived availability of support or autonomy vis-à-vis domestic, regional, and international sources of power at the time. This book illustrates how these two region-wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments: the end of WWII with the ensuing American and Soviet-led bipolar system, and the end of the Cold War with American primacy. Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates, altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices. The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic, regional, and international forces, material and intellectual, all of which were themselves greatly transformed in the wake of these two global geopolitical realignments.

Hope in the Thought of Jacques Ellul Lawrence J. Terlizze, 2005-10-30 Hope expresses more than an area of concentration in Ellul's thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world's embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction
