Character Development Through Risks & Survival to Meet Marriage Crisis Polly Winner, 2013-08-30 This narrative is the life story of a young girl who dreamed big of a wonderful marriage. A drastic end to her dream came after forty-three years as a result of her mate's accumulated harbored resentments. A lack of forgiveness led to stress which accelerated his depressed state. It demonstrates how a person's Character House is developed over the span of life without the individual's awareness. What a person is inside and not what is displayed on the outside is the main source of strength to face the difficulties of life including marriage. The story demonstrates how both Character House's evolved and how one was confident and was a survivor. The other turned difficulties into stress and depression. Counseling did not work as the emphasis was on changing the other mate and not self. Carrying stress for long periods increased to the point of despair. The crisis came with its drastic affects on the marriage union. The author hopes the aspects covered in the book will help the reader to avoid the snares that trip up the lives of a couple. It is based on scattered true events with names and pictures changed for privacy reasons. Having a steady focus and good character materials was vital for her survival. Her character developed in observing her family overcome and her own victory over the many tough places in life. If marriage is contemplated hopefully careful attention will be given to the serious decision. Careful observation of the other's reactions to stress and difficulties might be a clue in what the future would hold. Above all keep a good compass to stay fortified for future challenges. Prayer to a Christian compares to the root system of a tree. It helps the person stand live and grow. God turned her weakness and inadequacies into strength in finding resolutions to her despair. Prayer was the bridge between panic and peace as the crisis came.

Common Core Mathematics Standards and Implementing Digital Technologies Polly, Drew, 2013-05-31 Standards in the American education system are traditionally handled on a state-by-state basis which can differ significantly from one region of the country to the next. Common Core Mathematics Standards and Implementing Digital Technologies provides a critical discussion of educational standards in mathematics and how communication technologies can support the implementation of common practices across state lines. Leaders in the fields of mathematics education and educational technology will find an examination of the Common Core State Standards in Mathematics through concrete examples, current research, and best practices for teaching all students regardless of grade level or regional location.
