*Smartphone-Based Indoor Map Construction* Ruipeng Gao,Fan Ye,Guojie Luo,Jason Cong,2018-03-27 This book focuses on ubiquitous indoor localization services specifically addressing the issue of floor plans It combines computer vision algorithms and mobile techniques to reconstruct complete and accurate floor plans to provide better location based services for both humans and vehicles via commodity smartphones in indoor environments e g a multi layer shopping mall with underground parking structures After a comprehensive review of scene reconstruction methods it offers accurate geometric information for each landmark from images and acoustics and derives the spatial relationships of the landmarks and rough sketches of accessible areas with inertial and WiFi data to reduce computing overheads It then presents the authors recent findings in detail including the optimization and probabilistic formulations for more solid foundations and better robustness to combat errors several new approaches to promote the current sporadic availability of indoor location based services and a holistic solution for floor plan reconstruction indoor localization tracking and navigation The novel approaches presented are designed for different types of indoor environments e g shopping malls office buildings and labs and different users A valuable resource for researchers and those in start ups working in the field it also provides supplementary material for students with mobile computing and networking backgrounds

Advanced Hybrid Information Processing Shuai Liu,Xuefei Ma,2022-01-18 This two volume set constitutes the post conference proceedings of the 5th EAI International Conference on Advanced Hybrid Information Processing ADHIP 2021 held in October 2021 Due to COVID 19 the conference was held virtually The 94 papers presented were selected from 254 submissions and focus on theory and application of hybrid information processing technology for smarter and more effective research and application The theme of ADHIP 2020 was Social hybrid data processing The papers are named in topical sections as follows Intelligent algorithms in complex environment AI system research and model design Method research on Internet of Things technology Research and analysis with intelligent education

Handbook of Signal Processing Systems Shuvra S. Bhattacharyya,Ed F. Deprettere,Rainer Leupers,Jarmo Takala,2013-06-20 Handbook of Signal Processing Systems is organized in three parts The first part motivates representative applications that drive and apply state of the art methods for design and implementation of signal processing systems the second part discusses architectures for implementing these applications the third part focuses on compilers and simulation tools describes models of computation and their associated design tools and methodologies This handbook is an essential tool for professionals in many fields and researchers of all levels

**Communications and Multimedia Security** Bart De Decker,André Zúquete,2014-08-27 This book constitutes the refereed proceedings of the 15th IFIP TC 6 TC 11 International Conference on Communications and Multimedia Security CMS 2014 held in Aveiro Portugal in September 2014 The 4 revised full papers presented together with 6 short papers 3 extended abstracts describing the posters that were discussed at the conference and 2 keynote talks were carefully reviewed and selected from 22 submissions The papers are

organized in topical sections on vulnerabilities and threats identification and authentication applied security *Lithium-Ion Cells* Yuri Koshtyal ,Alexander Rumyantsev,2024-12-24 A large quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications

**Robot Intelligence Technology and Applications 4** Jong-Hwan Kim,Fakhri Karray,Jun Jo,Peter Sincak,Hyun Myung,2016-07-08 This book covers all aspects of robot intelligence from perception at sensor level and reasoning at cognitive level to behavior planning at execution level for each low level segment of the machine It also presents the technologies for cognitive reasoning social interaction with humans behavior generation ability to cooperate with other robots ambience awareness and an artificial genome that can be passed on to other robots These technologies are to materialize cognitive intelligence social intelligence behavioral intelligence collective intelligence ambient intelligence and genetic intelligence The book aims at serving researchers and practitioners with a timely dissemination of the recent progress on robot intelligence technology and its applications based on a collection of papers presented at the 4th International Conference on Robot Intelligence Technology and Applications RiTA held in Bucheon Korea December 14 16 2015 For better readability this edition has the total of 49 articles grouped into 3 chapters Chapter I Ambient Behavioral Cognitive Collective and Social Robot Intelligence Chapter II Computational Intelligence and Intelligent Design for Advanced

Robotics Chapter III Applications of Robot Intelligence Technology      MultiMedia Modeling Xiangjian He,Suhuai Luo,Dacheng Tao,Changsheng Xu,Jie Yang,Muhammad Abul Hasan,2014-12-22 The two volume set LNCS 8935 and 8936 constitutes the thoroughly refereed proceedings of the 21st International Conference on Multimedia Modeling MMM 2015 held in Sydney Australia in January 2015 The 49 revised regular papers 24 poster presentations were carefully reviewed and selected from 189 submissions For the three special session a total of 18 papers were accepted for MMM 2015 The three special sessions are Personal Big Data Modeling for Information Access and Retrieval Social Geo Media Analytics and Retrieval and Image or video processing semantic analysis and understanding In addition 9 demonstrations and 9 video showcase papers were accepted for MMM 2015 The accepted contributions included in these two volumes represent the state of the art in multimedia modeling research and cover a diverse range of topics including Image and Video Processing Multimedia encoding and streaming applications of multimedia modelling and 3D and augmented reality      **Android Programming for Beginners** John Horton,2015-12-31 Learn all the Java and Android skills you need to start making powerful mobile applications About This Book Kick start your Android programming career or just have fun publishing apps to the Google Play marketplace A first principles introduction to Java via Android which means you ll be able to start building your own applications from scratch Learn by example and build three real world apps and over 40 mini apps throughout the book Who This Book Is For Are you trying to start a career in programming but haven t found the right way in Do you have a great idea for an app but don t know how to make it a reality Or maybe you re just frustrated that to learn Android you must know java If so Android Programming for Beginners is for you You don t need any programming experience to follow along with this book just a computer and a sense of adventure What You Will Learn Master the fundamentals of coding Java for Android Install and set up your Android development environment Build functional user interfaces with the Android Studio visual designer Add user interaction data captures sound and animation to your apps Manage your apps data using the built in Android SQLite database Find out about the design patterns used by professionals to make top grade applications Build deploy and publish real Android applications to the Google Play marketplace In Detail Android is the most popular OS in the world There are millions of devices accessing tens of thousands of applications It is many people s entry point into the world of technology it is an operating system for everyone Despite this the entry fee to actually make Android applications is usually a computer science degree or five years worth of Java experience Android Programming for Beginners will be your companion to create Android applications from scratch whether you re looking to start your programming career make an application for work be reintroduced to mobile development or are just looking to program for fun We will introduce you to all the fundamental concepts of programming in an Android context from the Java basics to working with the Android API All examples are created from within Android Studio the official Android development environment that helps supercharge your application development process After this crash course we ll dive deeper into Android programming and you ll learn how to

create applications with a professional standard UI through fragments make location aware apps with Google Maps integration and store your user's data with SQLite In addition you'll see how to make your apps multilingual capture images from a device's camera and work with graphics sound and animations too By the end of this book you'll be ready to start building your own custom applications in Android and Java Style and approach With more than 40 mini apps to code and run **Android Programming for Beginners** is a hands on guide to learning Android and Java Each example application demonstrates a different aspect of Android programming Alongside these mini apps we push your abilities by building three larger applications to demonstrate Android application development in context

Samsung I9100 User Manual: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have captivated audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
