

SEWING MACHINE MAINTENANCE

Things to do on your own

Keep your machine covered

... And use a hard case to store it in! Dust and pet hair have peculiar ways to reach the most unexpected places. A cover will prevent and reduce the build-up of any kind of dirt and keep your machine cleaner.

Clean it after (almost) each use

A lint brush is the best tool, although any high-quality nylon brush will do. Some people recommend cans of compressed air, but they may add moisture which is not good for metal parts. And moist lint can jam up the machine.

Oil it/when needed

Check out your manual first, as many new machines don't need oiling. But, for those that need it, it will help the machine to run smoothly. Make sure that you use sewing machine oil only. Do this very carefully and add just a drop of oil on moving parts of your machine.

Replace needles regularly

Needles become dull over time, so you should change them to avoid looped threads and skipped stitches. You should replace your needle every 8 to 16 hours depending on the fibers you are sewing through. If you lose track of time, up to 3 full bobbins is another way to measure it.

Use appropriate bobbins, thread, and needles

Make sure that you always use the bobbins that are made for your machine. A high-quality thread will reduce the amount of lint. Also, avoid waxed or glazed thread as they are not good for your machine. Needles do a lot of work, so it is a good idea to use sharp and good-quality needles.
