

Newton's 1st Law - the law of inertia

An object with no net force acting on it remains at rest or in uniform.

- Objects at rest tend to stay at rest.
- Objects in motion tend to move in a straight line at constant speed.

Inertia - A property of matter which resists changes in motion.

The best measure of an object's inertia is its mass.

Force - A push or pull.

Net forces cause the motion of an object to change.

Examples of Newton's 1st Law in Action:

When you're in a car brake
when you're turning in a car.

In the egg demonstration:

Why does the tray fly across the table? Force was applied toward the tray

Why do the cardboard cylinders go with it? The friction force

Why do the eggs drop straight down into the water? is acting like a glue.
The eggs drop straight down because of gravity.

Physics Challenge: Why doesn't a car in motion on a flat road stay in motion?

Friction forces, and air resistance.

Examples of Accelerated Motion:

Speeding up : slowing down : Starting :
Changing direction : Stopping : moving in a circle

Inertia resists acceleration.

A net force causes acceleration.

Newton's 2nd Law - the law of acceleration

When a net force is applied to an object the object will accelerate in the direction of that force.

Internal Medicine second edition is part of a popular series specifically designed through an accessible note based style to ensure veterinarians and students have quick and easy access to comprehensive and practical clinical and diagnostic information. Distinct differences exist between cats and dogs not only in their physiology and metabolism but also in the way disease tends to present. This book is a short pocket guide to feline internal medicine helping you to formulate a diagnostic plan and therapeutic strategy. The focus is on evidence based medicine where available otherwise current best practice is presented. The book is divided into five sections. Section 1 gives an overview of some key areas of feline medicine including paediatric and geriatric medicine. Section 2 focuses on the approach to common presenting signs. Section 3 covers the differential diagnosis of commonly used haematologic and biochemical parameters. Section 4 presents an organ system based approach. Section 5 covers feline infectious diseases. CHANGES FOR THIS EDITION: Stronger focus is placed on initial testing for a disease and what changes might be expected. Additional sections have been added on sedation and anaesthesia, health screening, oncology and emergency and critical care. More diagrams have been added to aid understanding. Care has been taken to avoid repetition and focus on common conditions.
