People, Planet and Profit Samuel O. Idowu, Abubakar S. Kasum, 2016-05-13 It is no longer the case that it's only society which benefits from CSR actions. A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions. The editors of People Planet and Profit believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners insufficient attention has been paid to the end product of CSR in practice which they define in terms of social and economic developmental effect. The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World. The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion. Stakeholders including employees customers host communities governments and NGOs have diverse interests and expectations of CSR. This gives rise to questions about whether the activities corporations support are the ones today's stakeholders need whether the CSR programmes being delivered are adequate and about the relationship between the corporations view of what constitutes CSR and that of the supposed beneficiaries. This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions in terms of economic progress and social and political advancement

Quick Revision for Company Accounts & Audit (For ICWA Intermediate: Paper 12) Tulsian P.C. & Tulsian Bharat, Revision for Company Accounts Audit ICWA **Political Standards** Karthik Ramanna,2015-11-09 Prudent verifiable and timely corporate accounting is a bedrock of our modern capitalist system In recent years however the rules that govern corporate accounting have been subtly changed in ways that compromise these core principles to the detriment of the economy at large These changes have been driven by the private agendas of certain corporate special interests aided selectively and sometimes unwittingly by arguments from business academia With Political Standards Karthik Ramanna develops the notion of thin political markets to describe a key problem facing technical rule making in corporate accounting and beyond When standard setting boards attempt to regulate the accounting practices of corporations they must draw on a small pool of qualified experts but those experts almost always have strong commercial interests in the outcome Meanwhile standard setting rarely enjoys much attention from the general public This absence of accountability Ramanna argues allows corporate managers to game the system In the profit maximization framework of modern capitalism the only practicable solution is to reframe managerial norms when participating in thin political markets Political Standards will be an essential resource for understanding how the rules of the game are set whom they inevitably favor and how the process can be changed for a better capitalism *Resurgent Resource Nationalism* Mapungubwe Institute for Strategic Reflection (MISTRA),2016-02-15 The period between 2001 and 2008 saw the longest commodities boom in recent history Resource rich countries across the world developed more interest in the profits control and ownership of their natural resources South Africa which did not benefit much from the boom in commodity prices was nonetheless affected by the emergent resource nationalism trend and it became the focus of the governing party s 2010 National General Council which ultimately resulted in the constitution of a committee to review the country s policy and legislative framework regarding natural wealth

beneath the soil Although the resurgence of resource nationalism is a recent phenomenon the idea of state intervention in the economy and the extractive sector in particular is not new Resurgent Resource Nationalism is a qualitative study undertaken by MISTRA for SASOL Ltd that looks at the resurgence of resource nationalism over the past ten years It discusses the concept of resource nationalism and its manifestation in public policy It identifies the concerns drivers and instruments through which resource nationalism is pursued by various mining jurisdictions across regions It deliberately focuses more on the hydrocarbons sector in order to suit the target audience The aim is to observe macro trends emerging in various regions of the world and explore how best private actors can respond to the various forms of resource nationalism **International**
