Access to Power Ijlal Naqvi,2022 Pakistan s power sector s woes are less mystery than tragedy but to conclude simply that a weak state produces poor governance outcomes misses the manner in which these arrangements are important to reproducing existing relations of domination and are resistant to change The question this book addresses therefore isn t just about why Pakistan doesn t produce enough power

Radical Sex Between Men Dave Holmes,Stuart Murray,Thomas Foth,2017-08-29 Bringing together theory and public health practice this interdisciplinary collection analyses three forms of nonconventional or radical sexualities bareback sex BDSM practices and public sex Drawing together the latest empirical research from Brazil Canada Spain and the USA it mobilizes queer theory and poststructuralism engaging the work of theorists such as Bataille Butler Deleuze and Guattari and Foucault among others While the collection contributes to current research in gender and sexuality studies it does so distinctly in the context of empirical investigations and discourses on critical public health *Radical Sex Between Men* Assembling *Desiring Machines* will be of interest to advanced undergraduate students postgraduate students and researchers in gender and sexuality studies sexology social work anthropology and sociology as well as practitioners in nursing medicine allied health professions and psychology

Country Guide and Nor'west Farmer ,1911 *Informe de seguimiento de la educación en el mundo* Global Education Monitoring Report Team,UNESCO,2025-05-22 Geoinformatics in Support of Urban Politics and the Development of Civil Engineering Lousada, Sérgio António Neves,2023-06-02 In recent years the world of civil engineering has been changing considerably Within the many obstacles barriers and opportunities significant challenges should be considered for the future of civil engineering With the contribution of geoinformatics several scientific areas associated with civil engineering experienced rapid technological evolution Considering these challenges the future of civil engineering can be portrayed *Geoinformatics in Support of Urban Politics and the Development of Civil Engineering* portrays the evolution of the world of

civil engineering what happened in recent decades what will develop in the future and what the path will be This work characterizes the different academic areas of civil engineering demonstrating its evolution Covering topics such as landslide susceptibility mapping spatial data and local development this premier reference source is an essential resource for policymakers environmentalists scientists technicians decision makers engineers students and educators of higher education librarians researchers and academicians

The Ethics of Neuroscience and National Security Nicholas G. Evans, 2021-05-24 New advances in neuroscience promise innovations in national security especially in the areas of law enforcement intelligence collection and armed conflict But ethical questions emerge about how we can and should use these innovations This book draws on the open literature to map the development of neuroscience particularly through funding by the Defense Advanced Research Projects Agency in certain areas like behavior prediction behavior modification and neuroenhancement and its use in the creation of novel weapons It shows how advances in neuroscience and new technologies raise ethical issues that challenge the norms of law enforcement intelligence collection and armed conflict broadly grouped under the term national security Increasing technological sophistication without attention to ethics this book argues risks creating conditions for the development of dual use technologies that may be prone to misuse are grounded in an incomplete understanding of the brain or are based on a limited view of the political contexts in which these technologies arise A concluding section looks at policy and regulatory options that might promote the benefits of emerging neuroscience while mitigating attendant risks

Key Features First broad survey of the ethics of neuroscience as it applies to national security Innovative ethical analysis over a range of cross cutting technologies including behavior prediction and modification tools human enhancement and novel lethal and nonlethal weapons Ethical analysis covering all stages from the development testing and use or misuse of these technologies and decisions from the individual scientist to the nation state Strong policy focus at multiple levels from self governance to international regulation Combination of philosophical analysis with grounded practical recommendations

Smart on Crime Garrick L. Percival, 2015-07-28 The most punitive era in American history reached its apex in the 1990s but the trend has reversed in recent years Smart on Crime The Struggle to Build a Better American Penal System examines the factors causing this dramatic turnaround It relates and echoes the increasing need and desire on the part of actors in the American government system to construct a penal system that is more rational and humane Author Garrick L Percival points out that the prison boom did not naturally emerge as a governmental response to increasing crime rates Instead political forces actively built and shaped the growth of a more aggressive and populated penal system He is optimistic that the shifting political forces surrounding crime and punishment can now reform the system explaining how current political actors can craft more constructive and just policies and programs The book shows how rationality and humanitarianism lead to a penal system that imprisons fewer people does less harm to the lives of individual offenders and those close to them and is less expensive to maintain The book presents empirical data to concretely demonstrate what is working and what is not in

today's penal system. It closely examines policies and practices in Texas, Ohio, and California as comparative illustrations on what progress has been made or needs to be made in penal systems across the United States. The book includes a comprehensive discussion of highlighted issues and relates more than two dozen interviews with pivotal political actors who clarify why there is a major shift underway in the American penal system. Their insights reveal paths that can be taken to improve the current penal system.

Post Pandemic Facilitation of Air Transport Ruwantissa Abeyratne, 2022-06-27
From early 2020 for a period of two years at the end of which this book was written, air transport suffered unprecedented setbacks due to the COVID-19 pandemic. Although the pandemic may eventually fizzle out into another flu-like occurrence, the restraint with which air transport services were offered would remain with us for a while, with some practices being sustained, particularly those pertaining to public health. One of the main areas of air transport that was and will be affected significantly by the changed circumstances is facilitation, a subject that is regulated by the Chicago Convention of 1944 and its Annex 9. This book looks in depth at the Annex as it will be applied in a post-pandemic world against its legal, socio-political, and economic impacts, addressing the Standards of the Annex on clearance of aircraft entry and departure of passengers and the carriage of cargo. It also discusses some critical aviation events in 2020 and 2021 that occurred as they relate to facilitation of air transport. Some of the key areas discussed are the role of ICAO issues of public health as they relate to air transport, security of travel documents, smuggling of persons, digital technology, and rights of the passenger, unruly passengers, carriage of disabled passengers, relief flights, and repatriation flights, and facilities at airports.

Saturday Review of Literature, 1944 Yearbook of International Humanitarian Law, Volume 21 (2018) Terry D. Gill, Robin Geiß, Heike Krieger, Christophe Paulussen, 2019-10-31
The main theme of this volume of the Yearbook of International Humanitarian Law is weapons law. In several chapters, how International Humanitarian Law (IHL) copes with old and new weapons as well as political developments in regard to military technology is discussed, while in two chapters the significance of non or less lethal weapons in peacekeeping and law enforcement operations as well as the legality of lethal autonomous weapon systems under IHL are analysed. Moreover, the volume describes the current status of nuclear deterrence under international law. Another layer is added by examining how IHL influences the programming of automatic target recognition systems using artificial intelligence. The second part of the book contains a historic perspective on the roots of IHL in Europe, which can be traced back to the ninth century, as well as a Year in Review describing the most important events and legal developments in the area of IHL that took place in 2018. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, and civil servants.
