Slutski,2012-12-06 A famous French writer Anatole France liked to say The future is a convenient place to position our dreams 1927 Indeed this remark gains full meaning when one considers the history of what we call today Robotics For more than 3000 years mankind has dreamt ofthe possibility of arti ficial machines that would have all the advantages of human slaves without any of their drawbacks With the developments in technology since the end of World War II mainly with the explosive progress of computers it was thought we might at last succeed in transforming this everlasting dream into reality In the mind of scientists of the 1950 s to make such intelligent and autonomous machines before the year 2000 seemed a small challenge it was obvious thanks to computers and Artificial Intelligence But in spite of progress in some directions we must admit that

the dream remains a dream and that the basic problems denying us a successful issue are not solved In fact if we except industrial robots only calling for classical automata theory the main advanced result concerning autonomous and intelligent machines is related to some understanding of reasons why we have failed during the past years   Mobile Robotics: Solutions And Challenges - Proceedings Of The Twelfth International Conference On Climbing And Walking Robots And The Support Technologies For Mobile Machines Mohammad Osman Tokhi,O Tosun,Gurvinder S Virk,H L Akin,2009-08-26 This book provides state of the art scientific and engineering research findings and developments in the area of mobile robotics and associated support technologies The book contains peer reviewed articles presented at the CLAWAR 2008 conference Robots are no longer confined to industrial manufacturing environments with a great deal of interest being invested in the use of robots outside the factory environment The CLAWAR conference series established as a high profile international event acts as a platform for the dissemination of research and development findings and supports such a trend to address the current interest in mobile robotics in meeting the needs of mankind in various sectors of the society These include personal care public health and services in the domestic public and industrial environments The editors of the book have extensive research experience and publications in the area of robotics specifically in mobile robotics and their experience is reflected in the careful editing of the contents in the book   ECAI 2012 C.
