These percentile norms are based on the AIMSweb national norms for kindergarten through Grade 5. (For details, see AIMSweb National Norms Technical Documentation at www.aimsweb.com, under Research Studies and Information on the Research Norms.) The rate of improvement (rate score) point per student was calculated for each student in the norm sample for each of three seasons: fall-winter, winter-spring, and fall-spring. An RCH growth percentile indicates the percentage of students in the norm sample with an RCH score below a given value.

Students' average rate of improvement can differ depending on their initial performance level (e.g., in the fall for a fall-spring RCH). Therefore, the RCH growth norms were constructed based on four performance levels: Very Low (20%–40% percentile), Low (40%–50% percentile), Average (50%–70% percentile), High (70%–80% percentile), and Very High (80%–90% percentile). The relationship of RCH to each score level and time of year (fall-winter or winter-spring) is described in the AIMSweb RCH Growth Norms Guide, located on the Downloads tab in the AIMSweb system.

To find a student's RCH growth percentile, go to the section for the student's grade and select winter, fall, and then identify the column for the comparison interval (fall-winter, winter-spring, or fall-spring). Then, find the student's RCH in the norm column, and then read across the row to find the corresponding RCH growth percentile. For example, if a Grade 3 student obtains a fall to winter score of the 10th percentile (score), then this student's fall-spring RCH is 3 (fall percentile) or the 70th percentile (score).
