Watershed management in action Food and Agriculture Organization of the United Nations,2018-06-06 Watershed management has gained momentum over the past decade as a holistic way of conserving water land and biodiversity resources while sustaining livelihoods Based on 12 projects in Africa Asia and Latin America this publication looks at both the strengths and weaknesses of the approach and highlights the need for stronger governance and long term sustainability

Evaluation of projects related to the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security funded by Germany Food and Agriculture Organization of the United Nations,2021-06-04 FAO has been promoting the

Voluntary Guidelines on the Responsible Governance of Tenure of Land Fisheries and Forests VGGT in several countries and the Federal Republic of Germany had significantly contributed by financially supporting FAO's activities. The programme contributed through multi stakeholder platforms to an inclusive dialogue which led in most countries to the emergence of a common vision on land governance and positively influenced the land reform processes. It also triggered changes in mind set which are needed for long term improvements at country level. Results have shown that the VGGT while being international principles of land policy can be translated into concrete actions at the local level. The evaluation stressed the need for greater attention on developing activities to be carried out in local communities which result in defined precise and achievable gains on governance of tenure and to continue working on women and youth land access issues.

Improving ways to record tenure rights Food and Agriculture Organization of the United Nations, 2018-10-05. This guide is about making the recording or registration of tenure rights more relevant to people who hold those tenure rights and particularly to people who are currently poorly served by systems to record or register tenure rights. It provides practical advice on ways to improve the recording of tenure rights including by addressing barriers that prevent people from using recording systems.

again scholars have returned to sculpture to answer questions about Roman art society and history Indeed the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography and a variety of artistic media formats sizes and functions Exciting new theories methods and approaches have transformed the specialized literature on the subject in recent decades Rather than creating another chronological catalogue of representative examples from various periods genres and settings The Oxford Handbook of Roman Sculpture synthesizes current best practices for studying this central medium of Roman art situating it within the larger fields of Art History Classical Archaeology and Roman Studies This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature The Oxford Handbook of Roman Sculpture conveniently presents new technical scientific literary and theoretical approaches to the study of Roman sculpture in one reference volume while simultaneously complementing textbooks and other publications that present well known works in the corpus The contributors to this volume address metropolitan and provincial material from the early republican period through late antiquity in an engaging and fresh style Authoritative innovative and up to date The Oxford Handbook of Roman Sculpture will remain an invaluable resource for years to come

Guidelines on irrigation investment projects Food and Agriculture Organization of the United Nations,2019-04-15 Irrigation has been and will continue to be an agricultural and rural investment priority Development of the irrigation sector faces multiple challenges including water scarcity and degradation competition over shared resources and the impact of climate change Innovations are needed to address these challenges as well as emerging needs and to promote productive equitable and sustainable water management These guidelines produced by an inter agency team highlight experiences and lessons learned from global irrigation investment operations They introduce innovative approaches tools and references and provide practical guidance on how to incorporate or apply them at each stage of the investment project cycle The guidelines will be a useful resource for national and international professionals involved in irrigation investment operations

Water use in livestock production systems and supply chains. Guidelines for assessment Food and Agriculture Organization of the United Nations,2019-08-14 The Technical Advisory Group TAG for Water Use Assessment composed by 30 international experts has developed guidelines on water footprinting for livestock supply chains The mandate of the Water TAG was to provide recommendations to monitor the environmental performance of feed and livestock supply chains over time so that progress towards improvement targets can be measured apply the guidelines for feed and water demand of small ruminants poultry large ruminants and pig supply chains build on and go beyond the existing FAO LEAP guidelines and pursue alignment with relevant International Organization for Standardization ISO standards specifically ISO 14040 ISO 14044 ISO 2006b and 2006a and ISO 14046 ISO 2014 The guidelines on water use assessment include the impact assessment the assessment of the environmental performance related to water use of a livestock related system by assessing potential environmental impacts of blue water consumption following the water scarcity

footprint according to the framework provided by ISO 14046 ISO 2014 and the assessment of the system's productivity of green and blue water. The guidelines are thus intended to support the optimization of use of water resources and the identification of opportunities to decrease the potential impacts of water use in livestock production. The Water TAG guidance is relevant for livestock production systems including feed production from croplands and grasslands and production and processing of livestock products cradle to gate. It addresses all livestock production systems and livestock species considered in existing LEAP animal guidelines: poultry, pig, small ruminant and large ruminant supply chains. Rome and The Guidebook Tradition Anna Blennow, Stefano Fogelberg Rota, 2019-04-01. To this day no comprehensive academic study of the development of guidebooks to Rome over time has been performed. This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century. It is based on the results of the interdisciplinary research project Topos and Topography led by Anna Blennow and Stefano Fogelberg Rota. From the case studies performed within the project it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance. The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform with three important points of development: a turn towards a more user friendly structure from the seventeenth century and onward, the so called Baedeker effect in the mid nineteenth century and the introduction of a personalized guiding voice in the first half of the twentieth century. Thus the guidebook tradition is an unusually consistent literary oeuvre which also

forms a warranty for the authority of every new guidebook In this respect the guidebook tradition is intimately associated with the city of Rome with which it shares a constantly renovating yet eternally fixed nature *Identification guide to the deep-sea cartilaginous fishes of the Indian Ocean* Food and Agriculture Organization of the United Nations, 2018-11-15 This guide includes a selection of species of relevance to fisheries as well as species that may be of research educational and ecological importance The Indian Ocean deep sea chondrichthyan fauna is currently represented by 117 shark 61 batoid and 17 chimaera species This guide includes full species accounts for 36 shark species selected as being the more difficult to identify and or commonly caught **FAO Publications Series 2021** Food and Agriculture Organization of the United Nations , 2021-04-08 FAO s major publications series are presented together in a user friendly catalogue The catalogue features all of the most active series both new and long standing and is divided into areas of work including agriculture forestry fisheries trade and investment among others Each series entry includes technical specifications language versions most recent titles relevant ISSNs and QR codes linking to online resources in the FAO Document Repository **The United Nations World Water Development Report** UNESCO World Water Assessment Programme, 2022-03-02 Accounting for approximately 99% of all liquid freshwater on Earth groundwater has the potential to provide societies with tremendous social economic and environmental benefits and opportunities However this natural resource is often poorly understood and consequently undervalued mismanaged and even abused In spite of its overall abundance groundwater remains vulnerable to over exploitation and pollution both of which can have devastating effects on the resource and its availability In the context of growing water scarcity across many parts of the world the enormous potential of groundwater and the need to manage it sustainably can no longer be overlooked The 2022 edition of The United Nations World Water Development Report describes the challenges and opportunities associated with the development management and governance of groundwater across the world Global Governance and Rules for the Post-2015 Era Jose Antonio Alonso, José Antonio Ocampo, 2015-08-27 Attention is increasingly being paid to the conceptualization of the sustainable development agenda that should guide global development efforts beyond 2015 New trends are shaping the international environment suggesting that the world emerging from the recent economic and financial crisis will probably be very different from the one we have known so far The emerging issues demand new concerted responses and new international efforts which will have to be framed by new rules and more democratic and inclusive mechanisms of global governance *Global Governance and Rules for the Post 2015 Era* provides a unique assessment of global rules and governance a reflection of how global rules have been shaping development experiences and outcomes an identification of the shortcomings of current global governance mechanisms and innovative suggestions for reforming and improving them The various chapters analyse whether current rules and governance structures enables the building of effective responses against international problems and promote a fair distribution of development opportunities among countries This book is a timely contribution to the discussions on a new global

development agenda undertaken under the leadership of the United Nations It reflects the outcome of a research programme by a group of independent development experts brought together by the United Nations Committee for Development Policy CDP a subsidiary body of the Economic and Social Council It will be of interest to policymakers worldwide experts of international agencies scholars students and the wider public
