Introduction

What is a Wireless Network Extender?

A Wireless Network Extender is a device that allows you to extend the range of your wireless network. It can be used to connect devices that are out of range of your main router, or to create a new network in a different part of your home or office.

How to Use the Extender

The first step is to connect the extender to your main router. This can be done using a cable or wirelessly. Once connected, you can then connect your devices to the extender. The extender will then broadcast the signal to your devices, allowing them to access the internet.

Getting Started

- Unbox the extender and remove the protective film from the front panel.
- Connect the extender to your main router using the provided cable.
- Power on the extender and wait for the status lights to turn on.
