Tales of Research Misconduct Hub Zwart, 2017-09-14 This monograph contributes to the scientific misconduct debate from an oblique perspective by analysing seven novels devoted to this issue namely Arrowsmith by Sinclair Lewis 1925 The affair by C P Snow 1960 Cantor's Dilemma by Carl Djerassi 1989 Perlmann's Silence by Pascal Mercier 1995 Intuition by Allegra Goodman 2006 Solar by Ian McEwan 2010 and Derailment by Diederik Stapel 2012 Scientific misconduct i.e. fabrication falsification plagiarism but also other questionable research

practices have become a focus of concern for academic communities worldwide but also for managers funders and publishers of research The aforementioned novels offer intriguing windows into integrity challenges emerging in contemporary research practices They are analysed from a continental philosophical perspective providing a stage where various voices positions and modes of discourse are mutually exposed to one another so that they critically address and question one another They force us to start from the admission that we do not really know what misconduct is Subsequently by providing case histories of misconduct they address integrity challenges not only in terms of individual deviance but also in terms of systemic crisis due to current transformations in the ways in which knowledge is produced Rather than functioning as moral vignettes the author argues that misconduct novels challenge us to reconsider some of the basic conceptual building blocks of integrity discourse Except where otherwise noted this book is licensed under a Creative Commons Attribution 4 0 International License To view a copy of this license visit <http://creativecommons.org/licenses/by/4.0/>
