## Neuron Function Pogil Packet Answers:

**Neuron's Function Revealed**, 2009 There is a new way to explore biology's secrets. With a flash of light, scientists from the U.S. Department of Energy's Lawrence Berkeley National Laboratory and the University of California Berkeley zeroed in on the type of neural cell that controls swimming in larval zebrafish. Using innovative light-activated proteins and gene expression techniques, the scientists zapped several zebrafish with a pulse of light and initiated a swimming action in a subset of fish that was traced back to the type of neuron that drives the side-to-side motion of their tail fins. The technique behind this needle-in-haystack search for the neural roots of a specific behavior could become a powerful way to learn how any biological system works. <http://newscenter.lbl.gov/press-releases/2009/09/16/light-activated-protein/> *Macromolecules and the Function of the Neuron* A. *Trophic Function of the Neuron*, **Throphic Function of the Neuron** Daniel B. Drachman, 1974 **Function and Mechanism of Polarized Targeting of Neuronal Membrane Proteins** Joshua A. Barry, 2013 Abstract The ability of a neuron to survive and function properly requires many factors including a multitude of proteins. Membrane proteins are a specific class that are expressed within the plasma membrane and function in a variety of roles from action potential firing to neurotransmitter reuptake. To perform this variety of functions requires proper localization of these proteins; however, the exact functional relevance and underlying mechanisms that regulate this targeting is still an area of intense research. In this thesis, I examined the functional role that NgCAM had on inducing bundling of axons or dendrites via regulation by domain deletion or phosphorylation. I also examined how the polarized targeting of the splice variants of Kv3.1 could affect the maximal spiking frequency of neurons. Then I explored how Kv3.1 could induce clustering and activation of its motor kinesin 1 KIF5. Finally, I looked at the role that metal binding sites, specifically zinc, play on the localization and activity of Kv3.1. My various areas of research are all linked by the shared idea that the proper localization of membrane proteins can regulate the function of a neuron.
