disempowering patterns of thinking that you don't enjoy. Arm yourself today with this step by step guide for NLP and mind control. Have you ever had a memory that when brought up again brings out the worst emotions in you? Perhaps it's an overwhelming sense of fear that you feel despair, grief or embarrassment. It takes control of your current self and although the experience happened yesterday, a year ago or even a decade ago, the vividness of that memory has a huge impact on how you perceive the world today. So what if you could rewrite that memory and associate new feelings with it? Would you choose to be happy, satisfied or even entertained with that memory instead? This is one of the ideas that brought me into the field of neurolinguistic programming. With NLP you really can reprogram your mind, replacing disempowering thoughts with empowering ones that allow your life to move on and allow you to become a stronger and more successful person. In this book I broke down my studies of NLP into the 21 most important techniques that any beginner can use to get started. With each of these nuggets of knowledge I hope I can get you on the right track to making a few tweaks in your mental programming that will boost your level of success and skyrocket your confidence. I also hope you will be inspired to study each of these techniques further to really take advantage of the power of NLP. So what are you waiting for? A new life is waiting for you just around the corner. Here is a sneak peek of what I'll teach you: The Basics Of NLP, Anchoring Your Bookmark For A Particular Emotion, The Basics Of Pattern Interruption, The Swish Pattern For Rewiring Behavior, The Loop Break Technique For Subconscious Thinking, The Framing Technique For De-amplifying Bad Memories Using Presupposition For Hypnosis, NLP For Getting Others To Listen, The Milton Model For Hypnosis.
