Observing Comets Nick James, Gerald North, 2013-11-11 Since comet Shoemaker Levy collided with the planet Jupiter with stupendous force in 1994 there has been an upsurge of amateur interest in comets Most comets are first discovered by amateur astronomers because there are so many amateurs looking for them and techniques and instruments have improved dramatically in the past few years After a short but detailed introduction to the comets themselves Nick James and Gerald North describe comet hunting photographing and imaging comets and digital image processing The use of computers for orbital calculations and even helping to discover new comets is given a full chapter as are advanced techniques including comet photometry and spectroscopy This comprehensive book has an accompanying CD ROM and is at once a primer for comet hunters and a reference text for more advanced amateur astronomers

Observing Variable Stars, Novae and Supernovae Gerald North, Nick James, 2014-08-21 Gerald North's complete practical guide and resource package instructs amateur astronomers in observing and monitoring variable stars and other objects of variable brightness Descriptions of the objects are accompanied by explanations of the background astrophysics providing readers with real insight into what they are observing at the telescope The main instrumental requirements for observing and estimating the brightness of objects by visual means and by CCD photometry are detailed and there is advice on the selection of equipment The book contains a CD ROM packed with resources including hundreds of light curves and over 600 printable finder charts Containing extensive practical advice this comprehensive guide is an invaluable resource for amateur astronomers of all levels from novices to more advanced observers Gerald North is a lifelong amateur astronomer In addition to being a member of the British Astronomical Association since 1977 he is also the author of many books including Advanced Amateur Astronomy Cambridge 1997 and Observing the Moon Cambridge 2000

The Constellation Observing Atlas Grant Privett, Kevin Jones, 2013-08-13 Designed for anyone who wishes to learn the constellations or observe the best and brightest deep sky objects and double stars this book contains an alphabetical list of constellations complete with star maps historical background and highlights of deep sky objects Each entry contains position and physical information on

enough stars to support astronomers in star hopping swinging the telescope from star to star to star to arrive at a faint target. It provides a carefully selected list of accessible and rewarding deep sky objects. Full color maps show the constellations with star types spectral and physical indicated by the colors used on the map. Extended objects such as galaxies and nebulae are shown with the approximate apparent size in the sky. With unmatched thoroughness and accessibility this is a constellation atlas that makes the ideal companion to a night's telescope viewing for novices and expert amateur astronomers alike. Easy to navigate and refer to it is the key that unlocks the door to greater night sky exploration. *Make Time for the Stars* Antony Cooke, 2009-04-09 Many amateur astronomers are short of time. A full time career usually takes up most waking hours and often there simply isn't time for leisurely observing. Fortunately modern technologies such as computer controlled telescopes GPS north seeking and level detection have made telescope set up much quicker. Today's imaging systems enable astronomers to take excellent astrophotographs without the hours long exposures. *Make Time for the Stars* explains what to try on a tight schedule and how to use today's equipment to get the most astronomy out of the least time. This book showcases a wide array of quickly performed astronomical projects including various novel or new approaches to observing. There are also practical tips for maximizing time at the telescope extracting optimal performance quick and efficient set up and easily carried out optical maintenance. Significantly the book features detailed information on alternative imaging techniques with simple and less time consuming efforts. Observing the Moon Gerald North, 2007-07-05 Written by an experienced and well known lunar observer this is a hands on primer for the aspiring observer of the Moon. Whether you are a novice or are already experienced in practical astronomy you will find plenty in this book to help you raise your game to the next level and beyond. In this thoroughly updated second edition the author provides extensive practical advice and sophisticated background knowledge of the Moon and of lunar observation. It incorporates the latest developments in lunar imaging techniques including digital photography CCD imaging and webcam observing and essential advice on collimating all common types of telescope. Learn what scientists have discovered about our Moon and what mysteries remain still to be solved. Find out how you can take part in the efforts to solve these mysteries as well as enjoying the Moon's spectacular magnificence for yourself. *The Cambridge Guide to the Solar System* Kenneth R. Lang, 2003-09-25 The Cambridge Guide to the Solar System provides a comprehensive and up to date description of the planets and their moons. Writing at an introductory level appropriate for high school and undergraduate students Professor Lang leads the reader on a fascinating journey of exploration to the worlds beyond our home planet Earth. The book begins with a short introduction to the history of planetary observation and discovery. The major planets and their moons are then introduced by presenting common properties processes and themes. This is followed by chapters which focus on individual planets and other solar system objects including a comprehensive treatment of the various space missions from the Apollo missions to the Moon to recent missions to Jupiter and Mars. Filled with vital facts and information and lavishly illustrated in colour throughout this book will

also appeal to professionals as well as general readers with an interest in planetary science **Astronomy Now**, 2005
