Essay Sample on Occupational Therapy: Professional Qualifications to Enhance Recovery Essay

Introduction

Occupational therapy involves a type of treatment that facilitates people who have suffered from various illnesses recuperate and live a healthy life. The mode of practice enables all diverse patients to lead and adapt to a new life, depending on their conditions while participating in daily and regular activities. Occupational therapy is a highly sensitive practice that requires extreme knowledge and skills. Endorsing the medical practice requires professional qualifications, knowledge, and therapists who can handle and maintain high ethical standards. Therapists who engage in the occupation can help individuals living with particular disabilities, injuries, pain, and illnesses to adapt to activities. The individuals can undertake school work, jobs, moving around, taking care of themselves, household duties, and more.

As observed above, Occupational therapy involves handling individuals with particular health complications. It's a highly sensitive practice that requires maximum observation of the code of ethics to ensure the integrity and protection of clients to maintain the utmost confidentiality and transparency in the industry. The industry requires occupational therapists to observe high integrity and understand the consequences of breaking ethical codes. The guidelines play a vital role in ensuring that professionals maintain high integrity and also to protect the clients both emotionally and physically towards adapting a healthy and normal life. It's also vital for occupational therapists to stay up to date with ethical codes guiding the industry and also follow up on continuing education on ethical codes and standards for an excellent performance.

The need for professional and ethical standards promotes efficiency in running the industry. While handling individuals with particular disorders to adapt a normal life, it requires occupational therapists to follow a specific code of ethics to maintain integrity. Rehabilitating individuals to establish an experience where they can participate in everyday life activities involves commitment, dedication, and professional skills. The professional addresses psychological, physical, sensory-perceptual, cognitive, and other perspectives that enable the individuals to live a healthy and proactive life.

Borton (1970) provides Gibbs reflection cycle that outlines a simple reflective model as a reflective ladder for Occupational therapists to observe as a guideline. The particular model comprises of three questions that should be asked towards handling a specific condition in helping a patient. The questions include what? So what? Now what? The model questions advocates for the creation of a particular guideline that novice and professional practitioners should use to achieve a particular goal, as Jasper (2003, p99) calls it "real world of practice." The model can enable practitioners to construct a workable Action Plan to allow them to figure out the most appropriate approach to handle a particular condition and enable the affected individual to adapt to new life skills fast and easy.

Kielhofner's Research in

Occupational Therapy Renee R Taylor, 2017-01-05 With an international team of expert contributors Renee Taylor carries on Gary Kielhofner's innovative work in the 2nd Edition of his comprehensive research methodologies text. This guide bridges the gap between theorists and practitioners. It focuses on the relevance and logic of research to provide a practical demystified approach to conducting applied research in the field for graduate students and clinicians. You'll begin with an introduction to the nature and scope of research and its place in OT and then explore research designs, measurements, and statistical analysis for qualitative, quantitative, and mixed studies. You'll examine the steps and procedures required to conduct research and how research can be used to shape professional practice and improve patient care.

Occupational Therapy in Community Mental Health Jennifer Michetti, 2016 Community mental health teams (CMHTs) commonly include workers with different educational backgrounds in dual roles including generalist (e.g., case manager) and specialist duties (e.g., occupational therapist). Culverhouse Parker, 2001 Little has been done to examine how occupational therapists (OTs) working on CMHTs understand their professional roles in relation to existing governing documents. Methods included a document review and content analysis identifying the role on paper compared and contrasted against individual interviews highlighting OTs' roles in practice. The study finds direction lacking from governing texts related to occupational therapy on CMHTs. OT practices are informed largely by previous student and work experiences, client needs, individual therapist skills, and team makeup. OTs find themselves experiencing seemingly opposing views (e.g., wide scope of practice vs. narrow scope all alone in a crowd, I do it all vs. it's all teamwork). The lens through which one chooses to view one's practice influences one's perception of how much work is designated as occupational therapy specific. Priority areas for improvement: 1. successfully navigating the dual role, 2. enabling more evidence-informed practice, 3. addressing role clarity, and 4. supporting clinical student placements on CMHTs.
