Couch, 2013-11-11 The idea of a joint ESO Australia meeting on the large number of exciting new facilities that are or will soon be available in the southern hemisphere arose quite naturally. In the optical and the near infrared the Very Large Telescope VLT will soon be operational. In the radio the Australia Telescope Compact Array is going to be upgraded to higher frequencies 20 and 100 GHz together with an improvement in very long baseline interferometry VLBI facilities. Other major facilities such as the Large Millimetre Array and the SKA are being planned. Moreover new deep surveys are underway in the southern hemisphere the southern Hubble Deep Field the ESO Imaging Survey the Panoramic deep surveys with the UK Schmidt telescope and the Anglo Australian Telescope AAT 2dF galaxy QSO redshift survey in the optical and the Parkes multibeam HI survey and Molonglo Observatory Synthesis Telescope MOST Wide Field continuum survey at radio wavelengths. With all these new facilities important progress will be made regarding important issues such as the large scale structure of the universe the very early universe and the associated first epoch of galaxy formation. The generation of large databases and the opportunity for sensitive follow up observations in complementary wavebands mean that coordinated radio infrared and optical projects in the southern hemisphere are likely to become increasingly attractive and important.

The Leaves of October Don Sakers, 2003-04 The Hlutr immensely old terribly wise and utterly alien. Long before life crawled from the oceans of Earth the forests of the Hlutr stood on a million worlds. Their soundless songs filled space and their mastery of evolution had brought peace to countless planets. When Mankind went out into the stars he found the Hlutr waiting for him. Waiting to observe to converse to help. Waiting to judge and if necessary to destroy. Humans were savage uncontrolled aggressive and unpredictable. Should the Hlutr encourage them or exterminate them. Parts One and Two of this book originally published as Analog novelettes each appeared in The World's Best SF anthologies for their respective years. The novel was a finalist for the Compton Crook Award. Wavelengths Online calls it an underrated SF gem. Speed of C Productions is proud to bring The Leaves of October back into print with a brand new epilogue written just for this edition.
