The book's central argument is that we need to include the decorative in the study of sculpture in order to present a more accurate and comprehensive account of the practice and profession of sculpture in this period. Drawing on new archival sources, sculptors and objects, this is the first sustained study of how and

why French sculptors collaborated with state and private luxury goods manufacturers between 1848 and 1895 Organised chronologically the book identifies three historically situated frameworks through which sculptors attempted to validate themselves and their work in relation to industry industrial art decorative art and objet d art Detailed readings are offered of sculptors who operated within and outside the Salon including S n Ch t Carrier Belleuse and Rodin and of diverse objects and materials from S es vases to pewter plates by Desbois and furniture by Barbedienne and Carabin By contesting the false separation of art from industry Claire Jones s study restores the importance of the sculptor manufacturer relationship and of the decorative to the history of sculpture The Central Liberal Truth Lawrence E. investigations into new innovations and scientific development such as the steam engine transportation and engineering the microscope spirit photography and the orrery as well as how this new technology is reproduced in illustrated periodicals The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science technology and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin Auguste Rodin Gustave Caillebotte and Camille Pissarro in colonial nineteenth century novels in design manuals in museums and in the decorations of domestic interior spaces *Visions of the Industrial Age 1830 1914* offers a thorough exploration of both the nature of modernity and the nature of the visual *Rodin* Albert E.
