how the psychology of school climate and how the elements of school climate can be viewed from a population based perspective as well as understanding the impact of school climate on individual students This review of school climate research includes hundreds of articles and research papers of different perspectives from around the world in numerous cultures School climate is becoming a science of education and psychology that must be studied further in order to understand the dynamic nature of learning environments to identify elements that support or threaten the learning environment and to learn how to improve the conditions for learning in all schools Official Gazette Philippines,2004
