Harris,2011 Weve had 20 years of government level conferences at Kyoto Copenhagen and Cancun but greenhouse gas emissions continue to rise Taking a cosmopolitan approach to climate change in this excellent and timely book Paul Harris and his contributors argue that citizen action is an essential complement to state action The challenging unsettling and absolutely vital argument of these high quality essays is that distance makes no moral difference in our globalised world individual high emitters have a duty to reduce their emissions wherever they are Andrew Dobson Keele University UK This collection of provocative essays re evaluates the worlds failed policy responses to climate change in the process demonstrating how cosmopolitan ethics can inform global environmental governance A cosmopolitan worldview points to climate related policies that are less international and more global From a cosmopolitan perspective national borders should not delineate obligations and responsibilities associated with climate change Human beings rather than the narrow interests of nation states ought to be at the centre of moral calculations and policy responses to climate change In this volume expert contributors examine questions of individual and global responsibility burden sharing among people and states international law and environmental justice capitalism and voluntary action pluralist cooperation and hegemony and alternative approaches to climate action and diplomacy The book helps to illuminate new principles for global environmental policy that can come from cosmopolitan conceptions of climate change *Chemical News and Journal of Physical Science* William Crookes,James H.
