Santos,2020-07-30 Nanotechnology for Oral Drug Delivery From Concept to Applications discusses the current challenges of oral drug delivery broadly revising the different physicochemical barriers faced by nanotechnology based oral drug delivery systems and highlighting the challenges of improving intestinal permeability and drug absorption Oral delivery is the most widely used form of drug administration due to ease of ingestion cost effectiveness and versatility by allowing for the accommodation of different types of drugs having the highest patient compliance In this book a comprehensive overview of the most promising and up to date engineered and surface functionalized drug carrier systems as well as opportunities for the development of novel and robust delivery platforms for oral drug administration are discussed The relevance of controlling the physicochemical properties of the developed particle formulations from size and shape to drug release profile are broadly reviewed Advances in both in vitro and in vivo scenarios are discussed focusing on the possibilities to study the biological material interface The industrial perspective on the production of nanotechnology based oral drug delivery systems is also covered Nanotechnology for Oral Drug Delivery From Concept to Applications is essential reading for researchers professors advanced students and industry professionals working in the development manufacturing and or commercialization of nanotechnology based systems for oral drug delivery targeted drug delivery controlled drug release materials science and biomaterials in vitro and in vivo testing of potential oral drug delivery technologies Highlights the relevance of oral drug delivery in the clinical setting Covers the most recent advances in the field of nanotechnology for oral drug delivery Provides the scientific community with data that can facilitate and guide their research **Theorizing**

Teaching and Learning in Asia and Europe John Chi-Kin Lee,Kerry J. Kennedy,2017-03-27 There has been much debate in recent times between the Anglo American tradition of curriculum studies and the Continental and North European tradition of didactics Didaktik As important as such debate has been this book seeks to add new voices to the debate representing ideas and traditions from a different part of the world The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of

investigation Chapters include Curriculum Reform and Research in China A Social Historical Perspective What Mathematics Did Teachers Learn Comparison of the School and the Pre Service Teacher Mathematics Curricula in Germany and Taiwan Living in Parallel Worlds A Transatlantic Dialogue between General Didactics and Instructional Design **Transforming School Systems Through Assessment, Technology, and Non-Traditional Learning Methods** Yünkül, Eyup,Güneş, Ahmet Melih,2024-08-26 In today s rapidly changing education landscape integrating assessment technology and non traditional learning methods is essential for fostering student success Data driven assessments allow educators to tailor their strategies to meet each student s unique needs while advanced technologies enhance accessibility and engagement Non traditional methods promote critical thinking and real world problem solving skills By implementing these innovative approaches education can be transformed for a more inclusive future for all students Transforming School Systems Through Assessment Technology and Non Traditional Learning Methods explores these pivotal changes providing a comprehensive understanding of how they are reshaping school systems globally This book gathers insights research and practical applications that highlight the transformative power of these elements in creating more effective inclusive and engaging learning environments Covering topics such as change management learning through play and teacher leadership this book is an excellent resource for educators school administrators researchers academicians policy makers education consultants technology developers edtech developers graduate students and preservice teachers *Renewable and Waste-Heat Utilisation Technologies* Nareshkumar B. Handagama,Martin T. White,Paul Sapin,Christos N. Markides,2023-06-01 Understand the science and engineering behind conventional and renewable heat loss recovery techniques with this thorough reference Provides you with the knowledge and tools necessary to assess the potential waste heat recovery opportunities that exist within various industries and select the most suitable technology In particular technologies that convert waste heat into electricity cooling or high temperature heating are discussed in detail alongside more conventional technologies that directly or indirectly recirculate heat back into the production process Essential reading for professionals in chemical manufacturing mechanical and processing engineering who have an interest in energy conservation and waste heat recovery **Science Education in the Arab Gulf States** Nasser Mansour,Saeed Al-Shamrani,2015-04-27 The book introduces the development of science education in the Arab Gulf states and presents a critical analysis of current issues and concerns in educational research in science education The key purpose is to provide some perspectives on the state of science education in Gulf and to share experiences with international scholars about the impact of the innovations and reforms implemented in science education in Arabian Gulf But Science Education in the Arab Gulf States also intends to present new visions and to make suggestions and recommendations about the contribution of science education to prepare students in the knowledge age The volume is organised into three main sections The first section addresses the current practices and challenges in science education in some of the Arab Gulf states This section sheds critically the light on the
